antibodies

## Datasheet for ABIN3126050 MBTPS2 Protein (AA 248-442) (His tag)

Overview

Image

Overview	
Quantity:	1 mg
Target:	MBTPS2
Protein Characteristics:	AA 248-442
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MBTPS2 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)
Product Details	
Sequence:	TGVGVLITEV AEDSPAIGPR GLFVGDLVTH LQDCPVTNVQ DWNECLDTIA YEPQIGYCIS
	ASTLQQLSFP VRAYKRLDGS TECCNNHSLT DVCFSYRNNF NKRLHTCLPA RKAVEATQVC
	RSNKDCKSGA SSSFCIVPSL ETHTRLIKVK HPPQIDMLYV GHPLHLHYTV SITSFIPRFN
	FLSIDLPVIV ETFVK
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Mouse Mbtps2 Protein (raised in Insect Cells) purified by multi-step, protein-specific process
	to ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3126050 | 09/11/2023 | Copyright antibodies-online. (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer. The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.Purification:Two step purification of proteins expressed in baculovirus infected SF9 insect cells: 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.Purity:>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.Sterility:0.22 µm filteredEndotoxin Level:Protein is endotoxin free.Grade:Crystallography gradeTarget DetailsMBTPS2		
cannot be expressed or purified.In the unikkely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered. Alternative Name: Mbtps2 (MBTPS2 Products)	Target:	MBTPS2
	Alternative Name:	Mbtps2 (MBTPS2 Products)

Background:	Intramembrane proteolysis of sterol-regulatory element-binding proteins (SREBPs) within the
	first transmembrane segment thereby releasing the N-terminal segment with a portion of the
	transmembrane segment attached. Site-2 cleavage comes after site-1 cleavage which takes

Target Details	
	place in the lumenal loop (By similarity). {ECO:0000250}.
Molecular Weight:	22.7 kDa Including tag.
UniProt:	Q8CHX6
Pathways:	ER-Nucleus Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
