Datasheet for ABIN3126229 SNAPC1 Protein (AA 1-389) (His tag)

Image

Overview

Quantity:	1 mg
Target:	SNAPC1
Protein Characteristics:	AA 1-389
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SNAPC1 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB), Crystallization (Crys)

Product Details

Sequence:	MGTPAGAGTR PTGAGTVEGV GIPPGLQTDY ETLLSRFQEM DSVRFEDFTE LWRSMKFATI
	FCGKMRNLKK NMFTKEALAL AWRYFLPPHT FQIRVGALYL LYGLYNTQLC QPKQKIRVAL
	KDWDEVIRFQ QDLMNAQHFD AAFVFRKLRL DRAFHFTAMP KLLSCRMKKK VQQTEVTQKF
	KDPNDRVMKL ITSDVLEEML NVHDHYQNMK HAISADKSMP DRALSLVKED FFENIKNIVL
	EHQEWHKERK NPSLKPKLKD GEENGEGSSE EPERCERAVS LAKIKAKAFS AVVPVSKSRR
	HRQSKLDSSD SDSGSGQVQG RAAKRKRTRE PAGPAGRKRS SRSKGNAPNE RKEEKSLHLS
	MPIITEEEEE DMGGVRKAEF TAPKRKRKC
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Snapc1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.

	id design (Gene synthesis).
This protein is a made to order protein and	will be made for the first time for your order. Our
experts in the lab will ensure that you receive	ve a correctly folded protein.
The big advantage of ordering our made-to	-order proteins in comparison to ordering custom
made proteins from other companies is that	t there is no financial obligation in case the protein
cannot be expressed or purified.	
In the unlikely event that the protein cannot	be expressed or purified we do not charge anything
(other companies might charge you for any	performed steps in the expression process for
custom-made proteins, e.g. fees might app	ly for the expression plasmid, the first expression
experiments or purification optimization).	
When you order this made-to-order protein	you will only pay upon receival of the correctly
folded protein. With no financial risk on you	r end you can rest assured that our experienced
protein experts will do everything to make s	sure that you receive the protein you ordered.
The concentration of our recombinant prote	eins is measured using the absorbance at 280nm.
The protein's absorbance will be measured	in several dilutions and is measured against its
specific reference buffer.	
The concentration of the protein is calculat	ed using its specific absorption coefficient. We use
the Expasy's protparam tool to determine the	ne absorption coefficient of each protein.
Purification: Two step purification of proteins expressed	l in baculovirus infected SF9 insect cells:
1. In a first purification step, the protein is p	urified from the cleared cell lysate using three
	yield, EDTA resistant, or DTT resistant. Eluate
fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best p	urification are subjected to second purification step
	Eluate fractions are analyzed by SDS-PAGE and
Western blot.	
Purity: >95 % as determined by SDS PAGE, Size Ex	clusion Chromatography and Western Blot.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade	
Target Details	
Target: SNAPC1	

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3126229 | 01/16/2024 | Copyright antibodies-online. Target Details	
Background:	Part of the SNAPc complex required for the transcription of both RNA polymerase II and III small-nuclear RNA genes. Binds to the proximal sequence element (PSE), a non-TATA-box basal promoter element common to these 2 types of genes. Recruits TBP and BRF2 to the U6 snRNA TATA box (By similarity). {ECO:0000250}.
Molecular Weight:	45.5 kDa Including tag.
UniProt:	Q8K0S9
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
