

## Datasheet for ABIN3126715 HBP1 Protein (AA 1-516) (Strep Tag)

Overview

Quantity:	250 µg
Target:	HBP1
Protein Characteristics:	AA 1-516
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This HBP1 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

## Product Details

Brand:	AliCE®
Sequence:	MVWEVKTNQM PNAVQKLLLV MDKRAPGMSD SLELLQCNEN LPSSPGYNSC DEHMELDDLP
	ELQAVQSDPT QSAIYQLSSD VSHQEYPRSS WSQNTSDIPE NTHREDEVDW LTELANIATS
	PQSPLMQCSF YNRSSPVHII ATSKSLHSYA RPPPVSSSSK SGPAFPHDHW KEETPVRHER
	ANSESESGIF CMSSLSDDDD LGWCNSWPST IWHCFLKGTR LCFHKESNKE WQDVEDFARA
	ASCDNEEEIQ MGTHKGYGSD GLKLLSHEES VSFGESVLKL TFDPGTVEDG LLTVECKLDH
	PFYVKNKGWS SFYPSLTVVQ HGIPCCEIHI GDVCLPPGHP DAINFDDSGV FDTFKSYDFT
	PMDSSAVYVL SSMARQRRAS LSCGGGPGTG QEFSGSEFSK SCGSPGSSQL SSSSLYAKAV
	KSHSSGTVSA TSPNKCKRPM NAFMLFAKKY RVEYTQMYPG KDNRAISVIL GDRWKKMKNE
	ERRMYTLEAK ALAEEQKRLN PDCWKRKRTN SGSQQH
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you

	have a special request, please contact us.
Characteristics:	Key Benefits:
	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Protein expressed with ALiCE® and purified in one-step affinity chromatography</li> <li>These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a <b>made-to-order protein</b> and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	The big advantage of ordering our <b>made-to-order proteins</b> in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
	Expression System:
	<ul> <li>ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.</li> <li>During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!</li> </ul>
	Concentration:
	<ul> <li>The concentration of our recombinant proteins is measured using the absorbance at 280nm</li> <li>The protein's absorbance will be measured against its specific reference buffer.</li> <li>We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.</li> </ul>
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

## Target Details

HBP1
Hbp1 (HBP1 Products)
HMG box-containing protein 1 (HMG box transcription factor 1) (High mobility group box transcription factor 1),FUNCTION: Transcriptional repressor that binds to the promoter region of target genes. Plays a role in the regulation of the cell cycle and of the Wnt pathway. Binds preferentially to the sequence 5'-TTCATTCATTCA-3'. Binding to the histone H1.0 promoter is enhanced by interaction with RB1. Disrupts the interaction between DNA and TCF4 (By similarity). {ECO:0000250 UniProtKB:O60381, ECO:0000269 PubMed:9178770}.
57.6 kDa
Q8R316
In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
<ul> <li>ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from</li> <li>Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.</li> <li>During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!</li> </ul>
For Research Use only
Liquid
The buffer composition is at the discretion of the manufacturer.
Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b>
