antibodies

## Datasheet for ABIN3126764 TSEN15 Protein (AA 1-168) (His tag)

Overview

0000000	
Quantity:	1 mg
Target:	TSEN15
Protein Characteristics:	AA 1-168
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This TSEN15 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)
Product Details	
Sequence:	MEERSDSEPT PGCSGPGPAP VRDGGGAHTW APEDAWMGTH PKYLEMMELD IGDATQVYIA
	FLVYLDLMES KSWHEVNCVG IPELQLICLL GTEIEGEGLQ TVVPTPISAS LSHNRIREIL
	KASRKLQGDP ELPMSFTLAI VESDSTIVYY KLTDGFMLPD PQNISLRR
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Mouse Tsen15 Protein (raised in Insect Cells) purified by multi-step, protein-specific process
	to ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	experte in the lab will choose that you receive a contextly folded protein.

	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Farget Details	
Farget:	TSEN15
Alternative Name:	Tsen15 (TSEN15 Products)
Background:	Non-catalytic subunit of the tRNA-splicing endonuclease complex, a complex responsible for
	identification and cleavage of the splice sites in pre-tRNA. It cleaves pre-tRNA at the 5' and 3' $$
	splice sites to release the intron. The products are an intron and two tRNA half-molecules
	bearing 2',3' cyclic phosphate and 5'-OH termini. There are no conserved sequences at the

## Target Details

	splice sites, but the intron is invariably located at the same site in the gene, placing the splice
	sites an invariant distance from the constant structural features of the tRNA body. The tRNA
	splicing endonuclease is also involved in mRNA processing via its association with pre-mRNA
	3'-end processing factors, establishing a link between pre-tRNA splicing and pre-mRNA 3'-end
	formation, suggesting that the endonuclease subunits function in multiple RNA-processing
	events (By similarity). {ECO:0000250}.
Molecular Weight:	19.5 kDa Including tag.
UniProt:	Q8R3W5
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
