Datasheet for ABIN3127338 TIPIN Protein (AA 1-278) (His tag)

Image

Overview

| Quantity: | 1 mg |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target: | TIPIN |
| Protein Characteristics: | AA 1-278 |
| Origin: | Mouse |
| Source: | Escherichia coli (E. coli) |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This TIPIN protein is labelled with His tag. |
| Application: | ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys) |
| Product Details | |
| Sequence: | MLEQEENGLF EIPDYEHVED ETFPPFPPPA SPERDPADAE PEEGSGSGVP VPPKRTVKRN |
| | LPKLDATRLT SERGLPALRH VFDKTKFKGK GHEAEDLKTL IRHMEHWAHR LFPKLQFEDF |
| | IDRVENLGNK KEVQTCLKRI RLDLPIVHED FVNNNDEVGE ANGPDVSATG FDPFLTSSSD |
| | SRKFASEPTR SLTEEQQQRI ERNKQLALER RQAKLLSNSQ SLENDVTVEE NSTGEDQEES |
| | NGLNIDTADG PHDVPFASTH EEEQCKAEET QLDHTNLD |
| | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a |
| | special request, please contact us. |
| Characteristics: | Made in Germany - from design to production - by highly experienced protein experts. Mouse Tipin Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). |
| | This protein is a made to order protein and will be made for the first time for your order. Our |

| | experts in the lab will ensure that you receive a correctly folded protein. |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | The big advantage of ordering our made-to-order proteins in comparison to ordering custom |
| | made proteins from other companies is that there is no financial obligation in case the protein |
| | cannot be expressed or purified. |
| | In the unlikely event that the protein cannot be expressed or purified we do not charge anything |
| | (other companies might charge you for any performed steps in the expression process for |
| | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression |
| | experiments or purification optimization). |
| | When you order this made-to-order protein you will only pay upon receival of the correctly |
| | folded protein. With no financial risk on your end you can rest assured that our experienced |
| | protein experts will do everything to make sure that you receive the protein you ordered. |
| | The concentration of our recombinant proteins is measured using the absorbance at 280nm. |
| | The protein's absorbance will be measured in several dilutions and is measured against its |
| | specific reference buffer. |
| | The concentration of the protein is calculated using its specific absorption coefficient. We use |
| | the Expasy's protparam tool to determine the absorption coefficient of each protein. |
| Purification: | Two step purification of proteins expressed in bacterial culture: |
| | In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. |
| | Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot. |
| Purity: | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot. |
| Sterility: | 0.22 μm filtered |
| Endotoxin Level: | Endotoxin has not been removed. Please contact us if you require endotoxin removal. |
| Grade: | Crystallography grade |

Target Details

| Target: | TIPIN |
|-------------------|----------------------------------------------------------------------------------------------------|
| Alternative Name: | Tipin (TIPIN Products) |
| Background: | Plays an important role in the control of DNA replication and the maintenance of replication fork |
| | stability. Important for cell survival after DNA damage or replication stress. May be specifically |

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3127338 | 09/11/2023 | Copyright antibodies-online. | | required for the ATR-CHEK1 pathway in the replication checkpoint induced by hydroxyurea or |
|---------------------|---------------------------------------------------------------------------------------------------|
| | ultraviolet light. Forms a complex with TIMELESS and this complex regulates DNA replication |
| | processes under both normal and stress conditions, stabilizes replication forks and influences |
| | both CHEK1 phosphorylation and the intra-S phase checkpoint in response to genotoxic stress. |
| | {EC0:0000269 PubMed:17141802}. |
| Molecular Weight: | 32.5 kDa Including tag. |
| UniProt: | Q91WA1 |
| | |
| Application Details | |
| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies |
| | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |

| | though. |
|----------|--------------------------------------------------------------------------------------------------|
| Comment: | Protein has not been tested for activity yet. In cases in which it is highly likely that the |
| | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher |
| | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible |
| | options with you in detail to assure that you receive your protein of interest. |
| | |

Restrictions:

For Research Use only

Handling

| Format: | Liquid |
|------------------|--------------------------------------------------------------------------------------------|
| Buffer: | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
| Expiry Date: | Unlimited (if stored properly) |
