antibodies

Datasheet for ABIN3127644 GATAD1 Protein (AA 1-266) (His tag)

Image

Overview

Quantity:	1 mg
Target:	GATAD1
Protein Characteristics:	AA 1-266
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This GATAD1 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)
Product Details	
Sequence:	MPLGLKPTCS MCKTTSSSMW KKSPQGEILC HHCTGRGGGG AGVAGGTGGG GGGGGGFGTT
	TFATTSAGPS QSNGGGGGKQ SKQEIHRRSA RLRNTKYKSA PAAEKKVSTK GKGRRHIFKL
	KNPIKAPESV STIVTAESIF YKGVYYQIGD VVSVIDEQDG KPYYAQIRGF IQDQYCEKSA
	ALTWLIPTLA SPRDQFDPAS YIIGPEEDLP RKMEYLEFVC HAPSEYFKSR SSPFPTVPTR
	PEKGYIWTHV GPTPAITIKE TVANHL
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Gatad1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our

experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified. In the unlikely event that the protein cannot be expressed or purified we do not charge anything other companies might charge you for any performed steps in the expression process for sustom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization). When you order this made-to-order protein you will only pay upon receival of the correctly olded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer. The concentration of the protein is calculated using its specific absorption coefficient. We use the concentration of the protein is calculated using its specific absorption coefficient. We use

wo step purification of proteins expressed in baculovirus infected SF9 insect cells:
. In a first purification step, the protein is purified from the cleared cell lysate using three
different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
fractions are analyzed by SDS-PAGE.
2. Protein containing fractions of the best purification are subjected to second purification step
through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
).22 µm filtered
Protein is endotoxin free.
Crystallography grade
).

Target Details

Target:	GATAD1
Alternative Name:	Gatad1 (GATAD1 Products)
Background:	Component of some chromatin complex recruited to chromatin sites methylated 'Lys-4' of histone H3 (H3K4me). {ECO:0000250}.

All rights reserved.

Target Details		
Molecular Weight:	29.5 kDa Including tag.	
UniProt:	Q920S3	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.	
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.	
Expiry Date:	Unlimited (if stored properly)
