antibodies

Datasheet for ABIN3127708 FAR1 Protein (AA 1-515) (Strep Tag)

Overview

Quantity:	1 mg
Target:	FAR1
Protein Characteristics:	AA 1-515
Origin:	Mouse
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This FAR1 protein is labelled with Strep Tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Sequence:	MVSIPEYYEG KNILLTGATG FLGKVLLEKL LRSCPRVNSV YVLVRQKAGQ TPQERVEEIL
	SSKLFDRLRD ENPDFREKII AINSELTQPK LALSEEDKEI IIDSTNVIFH CAATVRFNEN
	LRDAVQLNVI ATRQLILLAQ QMKNLEVFMH VSTAYAYCNR KHIDEVVYPP PVDPKKLIDS
	LEWMDDGLVN DITPKLIGDR PNTYIYTKAL AEYVVQQEGA KLNVAIVRPS IVGASWKEPF
	PGWIDNFNGP SGLFIAAGKG ILRTMRASNN ALADLVPVDV VVNTSLAAAW YSGVNRPRNI
	MVYNCTTGST NPFHWGEVEY HVISTFKRNP LEQAFRRPNV NLTSNHLLYH YWIAVSHKAP
	AFLYDIYLRM TGRSPRMMKT ITRLHKAMVF LEYFTSNSWV WNTDNVNMLM NQLNPEDKKT
	FNIDVRQLHW AEYIENYCMG TKKYVLNEEM SGLPAARKHL NKLRNIRYGF NTILVILIWR
	IFIARSQMAR NIWYFVVSLC YKFLSYFRAS STMRY
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.

Product Details

Characteristics:

Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALICE® and purified by multi-step, protein-specific process to ensure correct folding and modification.
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:

Two step purification of proteins expressed in Almost Living Cell-Free Expression System (ALiCE®):

- 1. In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.
- 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and

Product Details		
	Western blot.	
Purity:	\ge 80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)	
Target Details		
Target:	FAR1	
Alternative Name:	Far1 (FAR1 Products)	
Background:	Fatty acyl-CoA reductase 1 (EC 1.2.1.84),FUNCTION: Catalyzes the reduction of saturated and unsaturated C16 or C18 fatty acyl-CoA to fatty alcohols (PubMed:15220348, PubMed:15220349). It plays an essential role in the production of ether lipids/plasmalogens which synthesis requires fatty alcohols (By similarity). In parallel, it is also required for wax monoesters production since fatty alcohols also constitute a substrate for their synthesis (PubMed:15220349). {ECO:0000250 UniProtKB:Q8WVX9, ECO:0000269 PubMed:15220348, ECO:0000269 PubMed:15220349}.	
Molecular Weight:	59.4 kDa	
UniProt:	Q922J9	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.	
Comment:	ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required for	
	protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
