

Datasheet for ABIN3127713

CDCA7L Protein (AA 1-438) (Strep Tag)

So to Product page

_				
()	ve.	rv/	101	Λ

Quantity:	250 μg
Target:	CDCA7L
Protein Characteristics:	AA 1-438
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This CDCA7L protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Brand:	AliCE®
Sequence:	MELATRSQIP KEVADIFSAP SDDEEFVGFQ DDVPMQNLSE SCGSLDSREL EKQQNVCFRS
	KYFTEELRRI FKEDTDSEME DFEGFTESEL NMSSNPELME SELSDSDKAY PVMNDAEEDD
	EEEAAPRRGR STRRSSFGLR VAFQFPTKKL ARTPDKDSSH LLDSKTDLRR KKSSRQPKGK
	EDSASDAEDE SRAESQENSD ALLKRAMNIK ENKAMLAQLL AELNSVPDFF PVRTPPSASR
	RRTPRRAFSE GQITRRMNPT RSARPPEKFA LENFTFSATK LTEELYSFRR RKTISGGKCQ
	TYRRHRISSF RSVKDITEED LENIAITVRD KVYDKVLGNT CHQCRQKTID TKTVCRNQSC
	GGVRGQFCGP CLRNRYGEDV RTALLDPKWT CPPCRGICNC SYCRRRDGRC ATGILIHLAK
	FYGYDNVKEY LESLQKQL
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.

Characteristics:

Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- · We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	made-to-order

Target Details

Target:	CDCA7L	
Alternative Name:	Cdca7l (CDCA7L Products)	
Background:	Cell division cycle-associated 7-like protein (Transcription factor RAM2),FUNCTION: Plays a role	
	in transcriptional regulation as a repressor that inhibits monoamine oxidase A (MAOA) activity	
	and gene expression by binding to the promoter. Plays an important oncogenic role in	
	mediating the full transforming effect of MYC in medulloblastoma cells (By similarity). Involved	
	in apoptotic signaling pathways, May act downstream of P38-kinase and BCL-2, but upstream	
	of CASP3/caspase-3 as well as CCND1/cyclin D1 and E2F1. {ECO:0000250,	
	ECO:0000269 PubMed:16829576}.	
Molecular Weight:	50.2 kDa	
UniProt:	Q922M5	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies	
	as well. As the protein has not been tested for functional studies yet we cannot offer a	
	guarantee though.	
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from	
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce	
	even the most difficult-to-express proteins, including those that require post-translational modifications.	
	During lysate production, the cell wall and other cellular components that are not required for	
	protein production are removed, leaving only the protein production machinery and the	
	mitochondria to drive the reaction. During our lysate completion steps, the additional	
	components needed for protein production (amino acids, cofactors, etc.) are added to produce	
	something that functions like a cell, but without the constraints of a living system - all that's	
	needed is the DNA that codes for the desired protein!	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	The buffer composition is at the discretion of the manufacturer.	
	Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.	

Handling

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
