## Datasheet for ABIN3127890 STK26/MST4 Protein (AA 2-416) (His tag)

Overview

Image

Quantity:	1 mg
Target:	STK26/MST4 (MST4)
Protein Characteristics:	AA 2-416
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This STK26/MST4 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)

This protein is a made to order protein and will be made for the first time for your order. C experts in the lab will ensure that you receive a correctly folded protein.	ur
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in comparison to ordering cust	om
made proteins from other companies is that there is no financial obligation in case the pr	otein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we do not charge an	/thing
(other companies might charge you for any performed steps in the expression process fo	r
custom-made proteins, e.g. fees might apply for the expression plasmid, the first express	on
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the correctly	
folded protein. With no financial risk on your end you can rest assured that our experience	ed
protein experts will do everything to make sure that you receive the protein you ordered.	
The concentration of our recombinant proteins is measured using the absorbance at 280	nm.
The protein's absorbance will be measured in several dilutions and is measured against it	S
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient. We	e use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate	
fractions are analyzed by SDS-PAGE.	
2. Protein containing fractions of the best purification are subjected to second purificatio	n step
through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE ar	d
Western blot.	
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

Target Details	
Background:	Mediator of cell growth. Modulates apoptosis. {ECO:0000250 UniProtKB:Q9P289}.
Molecular Weight:	47.4 kDa Including tag.
UniProt:	Q99JT2
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
