Datasheet for ABIN3127916 arfgap2 Protein (AA 2-520) (His tag)

Image

Overview

Quantity:	1 mg
Target:	arfgap2
Protein Characteristics:	AA 2-520
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This arfgap2 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

Product Details

Sequence:	AASPSKTEIQ TIFKRLRAIP TNKACFDCGA KSPSWASITY GVFLCIDCSG VHRSLGVHLS

 Characteristics: Made in Germany - from design to production - by highly experienced protein experts. Mouse Arfgap2 Protein (raised in Insect Cells) purified by multi-step, protein-specific p to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering cus meda proteins from other acceptions in the table of the term is a financial obligation in second the protein in the term of the term is a financial obligation. 	rocess

The big advantage of ordering our made-to-order proteins in comparison to ordering cus)ur
	om
made proteins from other companies is that there is no financial obligation in case the p	otein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we do not charge a	ything
(other companies might charge you for any performed steps in the expression process f	or
custom-made proteins, e.g. fees might apply for the expression plasmid, the first expres	ion
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the correct	/
folded protein. With no financial risk on your end you can rest assured that our experience	ed
protein experts will do everything to make sure that you receive the protein you ordered.	
The concentration of our recombinant proteins is measured using the absorbance at 28	nm.
The protein's absorbance will be measured in several dilutions and is measured against specific reference buffer.	ts
The concentration of the protein is calculated using its specific absorption coefficient. W	e use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. 	!
 Protein containing fractions of the best purification are subjected to second purification through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE a Western blot. 	•
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

Target Details

-	
Target:	arfgap2
Alternative Name:	Arfgap2 (arfgap2 Products)
Background:	GTPase-activating protein (GAP) for ADP ribosylation factor 1 (ARF1). May regulate coatomer- mediated protein transport from the Golgi complex to the endoplasmic reticulum. Hydrolysis of ARF1-bound GTP may lead to dissociation of coatomer from Golgi-derived membranes to allow fusion with target membranes (By similarity). {ECO:0000250, ECO:0000269 PubMed:11278321}.
Molecular Weight:	57.4 kDa Including tag.
UniProt:	Q99K28
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.

Expiry Date: Unlimited (if stored properly)
