## Datasheet for ABIN3128175 TP53RK Protein (AA 1-244) (His tag)

Overview

Quantity:	1 mg
Target:	TP53RK
Protein Characteristics:	AA 1-244
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This TP53RK protein is labelled with His tag.
Application:	Western Blotting (WB), ELISA, Crystallization (Crys), SDS-PAGE (SDS)

## Product Details

Sequence:	MAGTSSEAEA EALAAARERS RLFLSGLELV QQGAEARVFR GRFQGRAAVV KHRFPKSYRH
	PELEARLGRR RTVQEARALL RCRRAGIAAP VVFFVDYASN CLYMEEIEDS VTVRDYIQST
	METEKDPQCL LDLARRMGQV LAGMHDQDLI HGDLTTSNML LRRPLAQLHI VLIDFGLSFV
	SGLPEDKGVD LYVLEKAFLS THPHTETAFE AFLKSYGASS KKSSPVLKKL DEVRLRGRKR SMVG
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	• Made in Germany - from design to production - by highly experienced protein experts.

	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 μm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	TP53RK

Target:	TP53RK
Alternative Name:	Tp53rk (TP53RK Products)
Background:	Component of the EKC/KEOPS complex that is required for the formation of a
	threonylcarbamoyl group on adenosine at position 37 (t(6)A37) in tRNAs that read codons
	beginning with adenine. The complex is probably involved in the transfer of the

## Target Details

	threonylcarbamoyl moiety of threonylcarbamoyl-AMP (TC-AMP) to the N6 group of A37.
	TP53RK has ATPase activity in the context of the EKC/KEOPS complex and likely plays a
	supporting role to the catalytic subunit OSGEP (By similarity). Atypical protein kinase that
	phosphorylates 'Ser-15' of p53/TP53 protein and may therefore participate in its activation (By
	similarity). {ECO:0000250}.
Molecular Weight:	28.3 kDa Including tag.
UniProt:	Q99PW4
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.

Expiry Date: Unlimited (if stored properly)

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
