## Datasheet for ABIN3128393 ATG12 Protein (AA 1-141) (His tag)

I Image

## Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | ATG12  |
| Protein Characteristics:      | AA 1-141   |
| Origin:                       | Mouse  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This ATG12 protein is labelled with His tag.   |
| Application:                  | ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)   |
| Product Details               |  |
| Sequence:                     | MSEDSEVVLQ LPSAPVGAGG ESLPELSPET ATPEPPSSAA VSPGTEEPPG DTKKKIDILL  |
|                               | KAVGDTPIMK TKKWAVERTR TIQGLIDFIK KFLKLVASEQ LFIYVNQSFA PSPDQEVGTL  |
|                               | YECFGSDGKL VLHYCKSQAW G  |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a   |
|                               | special request, please contact us.  |
| Characteristics:              | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Atg12 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul> |
|                               | State-of-the-art algorithm used for plasmid design (Gene synthesis).   |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our  |
|                               | experts in the lab will ensure that you receive a correctly folded protein.  |
|                               | The big advantage of ordering our made-to-order proteins in comparison to ordering custom  |

|                   | made proteins from other companies is that there is no financial obligation in case the protein  |
|-------------------|--|
|                   | cannot be expressed or purified.   |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                   | (other companies might charge you for any performed steps in the expression process for  |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                   | experiments or purification optimization).   |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                   | specific reference buffer.   |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:  |
|                   | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol> |
|                   | <ol> <li>Protein containing fractions of the best purification are subjected to second purification step<br/>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br/>Western blot.</li> </ol>                           |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:        | 0.22 µm filtered   |
| Endotoxin Level:  | Protein is endotoxin free.   |
| Grade:            | Crystallography grade  |
| Target Details    |  |
| Target:           | ATG12  |
| Alternative Name: | Atg12 (ATG12 Products)   |
| Background:       | Ubiquitin-like protein involved in autophagy vesicles formation. Conjugation with ATG5 through   |
|                   | a ubiquitin-like conjugating system involving also ATG7 as an E1-like activating enzyme and  |
|                   | ATG10 as an E2-like conjugating enzyme, is essential for its function. The ATG12-ATG5  |
|                   |  |

|                     | their association to the vesicle membranes. The ATG12-ATG5 conjugate also regulates               |
|---------------------|---|
|                     | negatively the innate antiviral immune response by blocking the type I IFN production pathway     |
|                     | through direct association with RARRES3 and MAVS. Plays also a role in translation or delivery    |
|                     | of incoming viral RNA to the translation apparatus. {ECO:0000269 PubMed:11266458,                 |
|                     | EC0:0000269 PubMed:12890687, EC0:0000269 PubMed:20723759}.  |
| Molecular Weight:   | 16.2 kDa Including tag.   |
| UniProt:            | Q9CQY1  |
| Pathways:           | Autophagy   |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
|                     | though.   |
| Comment:            | Protein has not been tested for activity yet. In cases in which it is highly likely that the      |
|                     | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher   |
|                     | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible  |
|                     | options with you in detail to assure that you receive your protein of interest.                   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Liquid  |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.        |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.  |
| Storage:            | -80 °C  |
| Storage Comment:    | Store at -80°C.   |
| Expiry Date:        | Unlimited (if stored properly)  |
|                     |   |

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
