## Datasheet for ABIN3128901 CHORDC1 Protein (AA 2-331) (His tag)

## Overview

Quantity:	1 mg
Target:	CHORDC1
Protein Characteristics:	AA 2-331
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CHORDC1 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

## Product Details

Sequence:	ALLCYNRGCG QRFDPEANSD DACTYHPGVP VFHDALKGWS CCKRRTTDFS DFLSIVGCTK
	GRHNSEKPPE PVKPEVKTTE KKELSELKPK FQEHIIQAPK PVEAIKRPSP DEPMTNLELK
	ISASLKQALD KLKLSSGSEE DKKEEDSDEI KIGTSCKNGG CSKTYQGLQS LEEVCVYHSG
	VPIFHEGMKY WSCCRRKTSD FNTFLAQEGC TRGKHVWTKK DAGKKVVPCR HDWHQTGGEV
	TISVYAKNSL PELSQVEANS TLLNVHIVFE GEKEFHQNVK LWGVIDVKRS YVTMTATKIE
	ITMRKAEPMQ WASLELPTTK KQEKQKDIAD
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	CHORDC1
Alternative Name:	Chordc1 (CHORDC1 Products)

Background: Regulates centrosome duplication, probably by inhibiting the kinase activity of ROCK2.

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3128901 | 09/11/2023 | Copyright antibodies-online. ## Target Details

	Proposed to act as co-chaperone for HSP90. May play a role in the regulation of NOD1 via a
	HSP90 chaperone complex. In vitro, has intrinsic chaperone activity. This function may be
	achieved by inhibiting association of ROCK2 with NPM1. Involved in stress response. Prevents
	tumorigenesis (By similarity). {ECO:0000250, ECO:0000269 PubMed:16083881,
	ECO:0000269 PubMed:20230755, ECO:0000269 PubMed:20493909}.
Molecular Weight:	38.2 kDa Including tag.
UniProt:	Q9D1P4
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
