antibodies

## Datasheet for ABIN3129251 PMEPA1 Protein (AA 44-260) (His tag)

Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | PMEPA1   |
| Protein Characteristics:      | AA 44-260  |
| Origin:                       | Mouse  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This PMEPA1 protein is labelled with His tag.                        |
| Application:                  | Western Blotting (WB), ELISA, Crystallization (Crys), SDS-PAGE (SDS) |

## Product Details

| Sequence:        | LSHYKLSARS FISRHSQARR RDDGLSSEGC LWPSESTVSG GMPEPQVYAP PRPTDRLAVP   |
|------------------|---|
|                  | PFIQRSRFQP TYPYLQHEIA LPPTISLSDG EEPPPYQGPC TLQLRDPEQQ LELNRESVRA   |
|                  | PPNRTIFDSD LIDSTMLGGP CPPSSNSGIS ATCYSSGGRM EGPPPTYSEV IGHYPGSSFQ   |
|                  | HQQSNGPSSL LEGTRLHHSH IAPLENKEKE KQKGHPL  |
|                  | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a  |
|                  | special request, please contact us.   |
| Characteristics: | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Pmepa1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul> |
|                  | State-of-the-art algorithm used for plasmid design (Gene synthesis).  |
|                  | This protein is a made to order protein and will be made for the first time for your order. Our   |
|                  | experts in the lab will ensure that you receive a correctly folded protein.   |

|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom   |
|-------------------|---|
|                   | made proteins from other companies is that there is no financial obligation in case the protein   |
|                   | cannot be expressed or purified.  |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything  |
|                   | (other companies might charge you for any performed steps in the expression process for   |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression  |
|                   | experiments or purification optimization).  |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly  |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced  |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.   |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.  |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its  |
|                   | specific reference buffer.  |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use  |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.  |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:   |
|                   | 1. In a first purification step, the protein is purified from the cleared cell lysate using three   |
|                   | different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate   |
|                   | fractions are analyzed by SDS-PAGE.<br>2. Protein containing fractions of the best purification are subjected to second purification step |
|                   | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and  |
|                   | Western blot.   |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.  |
| Sterility:        | 0.22 µm filtered  |
| Endotoxin Level:  | Protein is endotoxin free.  |
| Grade:            | Crystallography grade   |
| Tarrat Dataila    |   |
| Target Details    |   |
| Target:           | PMEPA1  |
| Alternative Name: | Pmepa1 (PMEPA1 Products)  |
|                   |   |

| Background: | Functions as a negative regulator of TGF-beta signaling and thereby probably plays a role in cell |
|-------------|---|
|             | proliferation, differentiation, apoptosis, motility, extracellular matrix production and          |
|             | immunosuppression. In the canonical TGF-beta pathway, ZFYVE9/SARA recruits the                    |

## Target Details

|                     | intracellular signal transducer and transcriptional modulators SMAD2 and SMAD3 to the TGF-<br>beta receptor. Phosphorylated by the receptor, SMAD2 and SMAD3 then form a heteromeric<br>complex with SMAD4 that translocates to the nucleus to regulate transcription. Through<br>interaction with SMAD2 and SMAD3, LDLRAD4 may compete with ZFYVE9 and SMAD4 and<br>prevent propagation of the intracellular signal (PubMed:20129061). Also involved in down- |
|---------------------|--|
|                     | regulation of the androgen receptor (AR), enhancing ubiquitination and proteasome-mediated degradation of AR, probably by recruiting NEDD4. {ECO:0000269 PubMed:20129061}.   |
| Molecular Weight:   | 24.9 kDa Including tag.  |
| UniProt:            | Q9D7R2   |
| Pathways:           | Intracellular Steroid Hormone Receptor Signaling Pathway   |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies<br>as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee<br>though.  |
| Comment:            | Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.  |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.   |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.   |
| Storage:            | -80 °C   |
| Storage Comment:    | Store at -80°C.  |
| Expiry Date:        | Unlimited (if stored properly)   |
