Datasheet for ABIN3129669 ETHE1 Protein (AA 8-254) (His tag)

Overview	
Quantity:	1 mg
Target:	ETHE1
Protein Characteristics:	AA 8-254
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ETHE1 protein is labelled with His tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys)
Product Details	
Sequence:	VAGRRLSQQS ASGAPVLLRQ MFEPKSCTYT YLLGDRESRE AVLIDPVLET AHRDAQLIKE
	LGLKLLYAVN THCHADHITG TGVLRSLLPG CQSVISRLSG AQADLHIGEG DSIRFGRFAL
	ETRASPGHTP GCVTFVLNDQ SMAFTGDALL IRGCGRTDFQ QGCAKTLYHS VHEKIFTLPG
	NCLIYPAHDY HGLTVSTVEE ERTLNPRLTL SCEEFIKVMD NLNLPKPQQI DIAVPANMRC
	GVQTPPS
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Ethe1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our

All rights reserved.

	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

Target Details

Target:	ETHE1
Alternative Name:	Ethe1 (ETHE1 Products)
Background:	First described as a protein that can shuttle between the nucleus and the cytoplasm and
	suppress p53-induced apoptosis by sequestering the transcription factor RELA/NFKB3 in the

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/3 | Product datasheet for ABIN3129669 | 05/01/2024 | Copyright antibodies-online. Target Details

	cytoplasm and preventing its accumulation in the nucleus (By similarity). Sulfur dioxygenase
	that plays an essential role in hydrogen sulfide catabolism in the mitochondrial matrix.
	Hydrogen sulfide (H(2)S) is first oxidized by SQRDL, giving rise to cysteine persulfide residues.
	ETHE1 consumes molecular oxygen to catalyze the oxidation of the persulfide, once it has been
	transferred to a thiophilic acceptor, such as glutathione (R-SSH). Plays an important role in
	metabolic homeostasis in mitochondria by metabolizing hydrogen sulfide and preventing the
	accumulation of supraphysiological H(2)S levels that have toxic effects, due to the inhibition of
	cytochrome c oxidase. {ECO:0000250 UniProtKB:095571, ECO:0000269 PubMed:19136963}.
Molecular Weight:	28.0 kDa Including tag.
UniProt:	Q9DCM0
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C

Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
