antibodies

## Datasheet for ABIN3129901 Parvin, beta Protein (PARVB) (AA 1-365) (His tag)

Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | Parvin, beta (PARVB)   |
| Protein Characteristics:      | AA 1-365   |
| Origin:                       | Mouse  |
| Source:                       | Escherichia coli (E. coli)   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This Parvin, beta protein is labelled with His tag.                  |
| Application:                  | ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS) |

## Product Details

| Sequence:        | MSSAPPRSPT PRAPKMKKDE SFLGKLGGTL ARKKKTREVT DLQEEGKSAI NSPMAPALVD   |

| Product Details   |  |
|-------------------|--|
|                   | This protein is a made to order protein and will be made for the first time for your order. Our  |
|                   | experts in the lab will ensure that you receive a correctly folded protein.  |
|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom  |
|                   | made proteins from other companies is that there is no financial obligation in case the protein  |
|                   | cannot be expressed or purified.   |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                   | (other companies might charge you for any performed steps in the expression process for  |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                   | experiments or purification optimization).   |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                   | specific reference buffer.   |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:     | Two step purification of proteins expressed in bacterial culture:  |
|                   | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol> |
|                   | 2. Protein containing fractions of the best purification are subjected to second purification step<br>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br>Western blot.  |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:        | 0.22 µm filtered   |
| Endotoxin Level:  | Endotoxin has not been removed. Please contact us if you require endotoxin removal.  |
| Grade:            | Crystallography grade  |
| Target Details    |  |
| Target:           | Parvin, beta (PARVB)   |
| Alternative Name: | Parvb (PARVB Products)   |

Background: Adapter protein that plays a role in integrin signaling via ILK and in activation of the GTPases

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3129901 | 09/11/2023 | Copyright antibodies-online. |                     | CDC42 and RAC1 by guanine exchange factors, such as ARHGEF6. Is involved in the  |
|---------------------|--|
|                     | reorganization of the actin cytoskeleton and formation of lamellipodia. Plays a role in cell adhesion, cell spreading, establishment or maintenance of cell polarity, and cell migration (By |
|                     | similarity). {ECO:0000250}.  |
| Molecular Weight:   | 42.6 kDa Including tag.  |
| UniProt:            | Q9ES46   |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies  |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.  |
| Comment:            | Protein has not been tested for activity yet. In cases in which it is highly likely that the   |
|                     | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher  |
|                     | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.             |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.   |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.   |
| Storage:            | -80 °C   |
| Storage Comment:    | Store at -80°C.  |
| Expiry Date:        | Unlimited (if stored properly)   |
