Datasheet for ABIN3130304 GABRQ Protein (AA 22-638) (rho-1D4 tag)

Overview

Quantity:	1 mg
Target:	GABRQ
Protein Characteristics:	AA 22-638
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This GABRQ protein is labelled with rho-1D4 tag.
Application:	Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB)

Product Details

	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a

Product Details

• M tc • St	Made in Germany - from design to production - by highly experienced protein experts. Mouse Gabrq Protein (raised in Insect Cells) purified by multi-step, protein-specific process of ensure crystallization grade. tate-of-the-art algorithm used for plasmid design (Gene synthesis). a protein is a made to order protein and will be made for the first time for your order. Our erts in the lab will ensure that you receive a correctly folded protein. big advantage of ordering our made-to-order proteins in comparison to ordering custom de proteins from other companies is that there is no financial obligation in case the protein
This	erts in the lab will ensure that you receive a correctly folded protein. big advantage of ordering our made-to-order proteins in comparison to ordering custom
	big advantage of ordering our made-to-order proteins in comparison to ordering custom
expe	
The	de proteins from other companies is that there is no financial obligation in case the protein
mac	
cani	not be expressed or purified.
In th	ne unlikely event that the protein cannot be expressed or purified we do not charge anything
(oth	er companies might charge you for any performed steps in the expression process for
cust	tom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
expe	eriments or purification optimization).
Whe	en you order this made-to-order protein you will only pay upon receival of the correctly
fold	ed protein. With no financial risk on your end you can rest assured that our experienced
prot	ein experts will do everything to make sure that you receive the protein you ordered.
The	concentration of our recombinant proteins is measured using the absorbance at 280nm.
The	protein's absorbance will be measured in several dilutions and is measured against its
spec	cific reference buffer.
The	concentration of the protein is calculated using its specific absorption coefficient. We use
the	Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification: Three	ee step purification of membrane proteins expressed in baculovirus infected SF9 insect
cells	5:
di	lembrane proteins are fractioned by ultracentrifugation and subsequently solubilized with ifferent detergents (detergent screen). Samples are analyzed by Western blot.
rh	he best performing detergent is used for solubilization and the proteins are purified via their no1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate actions are analyzed by Western blot.
3. Pi th	rotein containing fractions of the best purification are subjected to second purification step nrough size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and /estern blot.
Purity: >95	% as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility: 0.22	2 µm filtered
Endotoxin Level: Prot	tein is endotoxin-free.

Product Details

Grade:

Crystallography grade

Target Details

Target:	GABRQ
Alternative Name:	Gabrq (GABRQ Products)
Background:	GABA, the major inhibitory neurotransmitter in the vertebrate brain, mediates neuronal inhibition by binding to the GABA/benzodiazepine receptor and opening an integral chloride channel.
Molecular Weight:	71.7 kDa Including tag.
UniProt:	Q9JLF1

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
