Datasheet for ABIN3130350 NOXA Protein (AA 1-103) (His tag)

Image

Overview

0.01.000	
Quantity:	1 mg
Target:	NOXA (PMAIP1)
Protein Characteristics:	AA 1-103
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This NOXA protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)
Product Details	
Sequence:	MPGRKARRNA PVNPTRAELP PEFAAQLRKI GDKVYCTWSA PDITVVLAQM PGKSQKSRMR
	SPSPTRVPAD LKDECAQLRR IGDKVNLRQK LLNLISKLFN LVT
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	• Made in Germany - from design to production - by highly experienced protein experts.
	Mouse Pmaip1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process
	to anouro anyotallization grada
	to ensure crystallization grade.State-of-the-art algorithm used for plasmid design (Gene synthesis).
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	 State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. Our

Product Details	
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

Target Details

Target:	NOXA (PMAIP1)
Alternative Name:	Pmaip1 (PMAIP1 Products)
Background:	Promotes activation of caspases and apoptosis. Promotes mitochondrial membrane changes
	and efflux of apoptogenic proteins from the mitochondria. Contributes to p53/TP53-dependent
	apoptosis after radiation exposure. Promotes proteasomal degradation of MCL1. Competes
	with BIM/BCL2L11 for binding to MCL1 and can displace BIM/BCL2L11 from its binding site on
	MCL1 (By similarity). Competes with BAK1 for binding to MCL1 and can displace BAK1 from its

Target Details	
	ECO:0000269 PubMed:16822983, ECO:0000269 PubMed:17389404}.
Molecular Weight:	12.5 kDa Including tag.
UniProt:	Q9JM54
Pathways:	p53 Signaling, Positive Regulation of Endopeptidase Activity, Regulation of Carbohydrate Metabolic Process, Positive Regulation of Response to DNA Damage Stimulus
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
