## Datasheet for ABIN3130469 DREAM Protein (AA 1-256) (Strep Tag)

Overview

Quantity:	1 mg
Target:	DREAM (KCNIP3)
Protein Characteristics:	AA 1-256
Origin:	Mouse
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This DREAM protein is labelled with Strep Tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA
Product Details	
Sequence:	MQRTKEAVKA SDGNLLGDPG RIPLSKRESI KWQRPRFTRQ ALMRCCLIKW ILSSAAPQGS
	DSSDSELELS TVRHQPEGLD QLQAQTKFTK KELQSLYRGF KNECPTGLVD EDTFKLIYSQ
	FFPQGDATTY AHFLFNAFDA DGNGAIHFED FVVGLSILLR GTVHEKLKWA FNLYDINKDG
	CITKEEMLAI MKSIYDMMGR HTYPILREDA PLEHVERFFQ KMDRNQDGVV TIDEFLETCQ
	KDENIMNSMQ LFENVI
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	Made in Germany - from design to production - by highly experienced protein experts.
	<ul> <li>Protein expressed with ALiCE<sup>®</sup> and purified by multi-step, protein-specific process to ensure correct folding and modification.</li> </ul>
	correct folding and modification.

- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

## Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

## Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:	Two step purification of proteins expressed in Almost Living Cell-Free Expression System (ALiCE®):
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.</li> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	≥ 80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)

Target:	DREAM (KCNIP3)
Alternative Name:	Kenip3 (KCNIP3 Products)
Background:	Calsenilin (A-type potassium channel modulatory protein 3) (DRE-antagonist modulator)
	(DREAM) (Kv channel-interacting protein 3) (KChIP3),FUNCTION: Calcium-dependent
	transcriptional repressor that binds to the DRE element of genes including PDYN and FOS.
	Affinity for DNA is reduced upon binding to calcium and enhanced by binding to magnesium.
	Seems to be involved in nociception. {EC0:0000269 PubMed:11792319,
	ECO:0000269 PubMed:14534243}., FUNCTION: Regulatory subunit of Kv4/D (Shal)-type
	voltage-gated rapidly inactivating A-type potassium channels, such as KCND2/Kv4.2 and
	KCND3/Kv4.3. Modulates channel expression at the cell membrane, gating characteristics,
	inactivation kinetics and rate of recovery from inactivation in a calcium-dependent and isoform
	specific manner. {EC0:0000269 PubMed:20943905, EC0:0000269 PubMed:22311982}.,
	FUNCTION: May play a role in the regulation of PSEN2 proteolytic processing and apoptosis.
	Together with PSEN2 involved in modulation of amyloid-beta formation (By similarity).
	{ECO:0000250 UniProtKB:Q9Y2W7}.
\ <b>4</b> = 1 = = 1 + 1 + 1 + 1 = 1 = 1 + 1 + 1	
Molecular Weight:	29.5 kDa
UniProt:	Q9QXT8
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational
	modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional
	components needed for protein production (amino acids, cofactors, etc.) are added to produce
	something that functions like a cell, but without the constraints of a living system - all that's
	needed is the DNA that codes for the desired protein!

## Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
