antibodies

Datasheet for ABIN3131011 GPR161 Protein (AA 344-545) (His tag)

Overview

000101000	
Quantity:	1 mg
Target:	GPR161
Protein Characteristics:	AA 344-545
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This GPR161 protein is labelled with His tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys)
Product Details	
Sequence:	NKTVRKELLG MCFGDRYYRE SFVQRQRTSR LFSISNRITD LGLSPHLTAL MAGGQSLGHS
	SSTGDTGFSY SQDSGTDVML LEDGTSEDNP PQHCTCPPKR RSSVTFEDEV EQIKEAAKNS
	LLHVKAEVHK SLDSYAASLA KAIEAEAKIN LFGEEALPGV LFTARTVPGA GFGGRRGSRT
	LVNQRLQLQS IKEGNVLAAE QR
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	 Mouse Gpr161 Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.
	 State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3131011 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	GPR161
Alternative Name:	Gpr161 (GPR161 Products)

Background:	Key negative regulator of Shh signaling, which promotes the processing of GLI3 into GLI3R
	during neural tube development. Recruited by TULP3 and the IFT-A complex to primary cilia and
	acts as a regulator of the PKA-dependent basal repression machinery in Shh signaling by

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3131011 | 09/11/2023 | Copyright antibodies-online. Target Details

	increasing cAMP levels, leading to promote the PKA-dependent processing of GLI3 into GLI3R
	and repress the Shh signaling. In presence of SHH, it is removed from primary cilia and is
	internalized into recycling endosomes, preventing its activity and allowing activation of the Shh
	signaling. Its ligand is unknown. {ECO:0000269 PubMed:18250320,
	ECO:0000269 PubMed:23332756}.
Molecular Weight:	23.0 kDa Including tag.
UniProt:	B2RPY5
Pathways:	cAMP Metabolic Process
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.

Expiry Date: Unlimited (if stored properly)
