Datasheet for ABIN3131218 G Protein-Coupled Receptor 116 Protein (GPR116) (AA 22-1348) (rho-1D4 tag)

## Overview

| Quantity:                     | 1 mg  |
|-------------------------------|---|
| Target:                       | G Protein-Coupled Receptor 116 (GPR116)                                   |
| Protein Characteristics:      | AA 22-1348  |
| Origin:                       | Mouse   |
| Source:                       | Insect Cells  |
| Protein Type:                 | Recombinant   |
| Purification tag / Conjugate: | This G Protein-Coupled Receptor 116 protein is labelled with rho-1D4 tag. |
| Application:                  | Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB)      |

|                  | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a  |
|                  | special request, please contact us.   |
| Characteristics: | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Adgrf5 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul> |
|                  |   |
|                  | This protein is a made to order protein and will be made for the first time for your order. Our   |
|                  | experts in the lab will ensure that you receive a correctly folded protein.   |
|                  | The big advantage of ordering our made-to-order proteins in comparison to ordering custom   |
|                  | made proteins from other companies is that there is no financial obligation in case the protein   |
|                  | cannot be expressed or purified.  |
|                  | In the unlikely event that the protein cannot be expressed or purified we do not charge anything  |
|                  | (other companies might charge you for any performed steps in the expression process for   |
|                  | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression  |
|                  | experiments or purification optimization).  |
|                  | When you order this made-to-order protein you will only pay upon receival of the correctly  |
|                  | folded protein. With no financial risk on your end you can rest assured that our experienced  |
|                  | protein experts will do everything to make sure that you receive the protein you ordered.   |
|                  | The concentration of our recombinant proteins is measured using the absorbance at 280nm.  |
|                  | The protein's absorbance will be measured in several dilutions and is measured against its  |
|                  | specific reference buffer.  |
|                  | The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:    | Three step purification of membrane proteins expressed in baculovirus infected SF9 insect   |

|                     | cells:   |
|---------------------|--|
|                     | 1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with   |
|                     | different detergents (detergent screen). Samples are analyzed by Western blot.   |
|                     | 2. The best performing detergent is used for solubilization and the proteins are purified via their<br>rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate<br>fractions are analyzed by Western blot. |
|                     |  |
|                     | 3. Protein containing fractions of the best purification are subjected to second purification step   |
|                     | through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and  |
|                     | Western blot.  |
| Purity:             | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:          | 0.22 µm filtered   |
| Endotoxin Level:    | Protein is endotoxin-free.   |
| Grade:              | Crystallography grade  |
| Target Details      |  |
| Target:             | G Protein-Coupled Receptor 116 (GPR116)  |
| Alternative Name:   | Adgrf5 (GPR116 Products)   |
| Background:         | Receptor that plays a critical role in lung surfactant homeostasis (PubMed:23590306,   |
|                     | PubMed:23922714, PubMed:23684610). May play a role in controlling adipocyte function   |
|                     | (PubMed:22971422). {ECO:0000269 PubMed:22971422, ECO:0000269 PubMed:23590306,  |
|                     | EC0:0000269 PubMed:23684610, EC0:0000269 PubMed:23922714}.   |
| Molecular Weight:   | 148.1 kDa Including tag.   |
| UniProt:            | G5E8Q8   |
| Pathways:           | Carbohydrate Homeostasis   |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies  |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurante though.   |
| Comment:            | Protein has not been tested for activity yet. In cases in which it is highly likely that the   |
|                     | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher  |
|                     | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible   |

| Application Details |  |
|---------------------|--|
|                     | options with you in detail to assure that you receive your protein of interest.            |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.   |
| Storage:            | -80 °C   |
| Storage Comment:    | Store at -80°C.  |
| Expiry Date:        | Unlimited (if stored properly)   |
