antibodies

Datasheet for ABIN3131418 PSMC3IP Protein (AA 1-217) (His tag)

Overview

Quantity:	1 mg
Target:	PSMC3IP
Protein Characteristics:	AA 1-217
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This PSMC3IP protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)
Product Details	
Sequence:	MSKSRAEAAA GAPGIILRYL QEQNRPYSAQ DVFGNLQKEH GLGKAAVVKA LDQLAQEGKI

 Characteristics:
 Made in Germany - from design to production - by highly experienced protein experts.

 •
 Made in Germany - from design to production - by highly experienced protein experts.

 •
 Mouse Psmc3ip Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.

 •
 State-of-the-art algorithm used for plasmid design (Gene synthesis).

 This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

All rights reserved.

	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	PSMC3IP
-	

Target:	PSMC3IP
Alternative Name:	Psmc3ip (PSMC3IP Products)
Background:	Plays an important role in meiotic recombination. Stimulates DMC1-mediated strand exchange required for pairing homologous chromosomes during meiosis. The complex PSMC3IP/MND1
	binds DNA, stimulates the recombinase activity of DMC1 as well as DMC1 D-loop formation

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3131418 | 09/11/2023 | Copyright antibodies-online. Target Details

	from double-strand DNA. This complex stabilizes presynaptic RAD51 and DMC1 filaments
	formed on single strand DNA to capture double-strand DNA. This complex stimulates both
	synaptic and presynaptic critical steps in RAD51 and DMC1-promoted homologous pairing.
	May inhibit HIV-1 viral protein TAT activity and modulate the activity of proteasomes through
	association with PSMC3. {ECO:0000269 PubMed:15192114, ECO:0000269 PubMed:16675459,
	ECO:0000269 PubMed:17426123, ECO:0000269 PubMed:17639080,
	ECO:0000269 PubMed:17639081, ECO:0000269 PubMed:9345291}.
Molecular Weight:	25.7 kDa Including tag.
UniProt:	035047
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
