## Datasheet for ABIN3131580 CDK14 Protein (AA 1-469) (His tag)

Image

#### Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | CDK14  |
| Protein Characteristics:      | AA 1-469   |
| Origin:                       | Mouse  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This CDK14 protein is labelled with His tag.                         |
| Application:                  | ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys) |

### Product Details

| Sequence:        | MCDLIEPQPA EKIGKMKKLR RTLSESFSRI ALKKEDTTFD EICVTKMSTR NCQGTDSVIK   |
|------------------|---|

to ensure crystallization grade.

• State-of-the-art algorithm used for plasmid design (Gene synthesis).

|                   | This protein is a made to order protein and will be made for the first time for your order. Our                               |
|-------------------|---|
|                   | experts in the lab will ensure that you receive a correctly folded protein.   |
|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom                                     |
|                   | made proteins from other companies is that there is no financial obligation in case the protein                               |
|                   | cannot be expressed or purified.  |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything                              |
|                   | (other companies might charge you for any performed steps in the expression process for                                       |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression                                  |
|                   | experiments or purification optimization).  |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly                                    |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced                                  |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.                                     |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.                                      |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its                                    |
|                   | specific reference buffer.  |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use                              |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.  |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:   |
|                   | 1. In a first purification step, the protein is purified from the cleared cell lysate using three                             |
|                   | different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. |
|                   | 2. Protein containing fractions of the best purification are subjected to second purification step                            |
|                   | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and  |
|                   | Western blot.   |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.  |
| Sterility:        | 0.22 µm filtered  |
| Endotoxin Level:  | Protein is endotoxin free.  |
| Grade:            | Crystallography grade   |
| Toward Data ile   |   |
| Target Details    |   |
| Target:           | CDK14   |
| Alternative Name: | Cdk14 (CDK14 Products)  |
|                   |   |

### Target Details

| Background:         | Serine/threonine-protein kinase involved in the control of the eukaryotic cell cycle, whose       |
|---------------------|---|
|                     | activity is controlled by an associated cyclin. Acts as a cell-cycle regulator of Wnt signaling   |
|                     | pathway during G2/M phase by mediating the phosphorylation of LRP6 at 'Ser-1490', leading to      |
|                     | the activation of the Wnt signaling pathway. Acts as a regulator of cell cycle progression and    |
|                     | cell proliferation via its interaction with CCDN3. Phosphorylates RB1 in vitro, however the       |
|                     | relevance of such result remains to be confirmed in vivo. May also play a role in meiosis,        |
|                     | neuron differentiation and may indirectly act as a negative regulator of insulin-responsive       |
|                     | glucose transport (By similarity). {ECO:0000250, ECO:0000269 PubMed:9547506}.                     |
| Molecular Weight:   | 53.9 kDa Including tag.   |
| UniProt:            | 035495  |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
|                     | though.   |
| Comment:            | Protein has not been tested for activity yet. In cases in which it is highly likely that the      |
|                     | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher   |
|                     | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible  |
|                     | options with you in detail to assure that you receive your protein of interest.                   |
| Restrictions:       | For Research Use only   |

# Handling

| Format:          | Liquid   |
|------------------|--|
| Buffer:          | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles.   |
| Storage:         | -80 °C   |
| Storage Comment: | Store at -80°C.  |
| Expiry Date:     | Unlimited (if stored properly)   |
