Datasheet for ABIN3131815 PRKAG1 Protein (AA 1-330) (His tag)

Overview

| Quantity: | 1 mg |
|-------------------------------|--|
| Target: | PRKAG1 |
| Protein Characteristics: | AA 1-330 |
| Origin: | Mouse |
| Source: | Escherichia coli (E. coli) |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This PRKAG1 protein is labelled with His tag. |
| Application: | SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys) |

Product Details

| Sequence: | MESVAAESSP ALENEHFQET PESNNSVYTS FMKSHRCYDL IPTSSKLVVF DTSLQVKKAF |
|------------------|--|
| | FALVTNGVRA APLWDSKKQS FVGMLTITDF INILHRYYKS ALVQIYELEE HKIETWREVY |
| | LQDSFKPLVC ISPNASLFDA VSSLIRNKIH RLPVIDPESG NTLYILTHKR ILKFLKLFIT |
| | EFPKPEFMSK SLQELQIGTY ANIAMVRTTT PVYVALGIFV QHRVSALPVV DEKGRVVDIY |
| | SKFDVINLAA EKTYNNLDVS VTKALQHRSH YFEGVLKCYL HETLETIINR LVEAEVHRLV |
| | VVDEHDVVKG IVSLSDILQA LVLTGGEKKP |
| | |
| | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a |
| | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us. |
| Characteristics: | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us. Made in Germany - from design to production - by highly experienced protein experts. Mouse Prkag1 Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade. |

| Product Details | |
|------------------|--|
| | This protein is a made to order protein and will be made for the first time for your order. Our |
| | experts in the lab will ensure that you receive a correctly folded protein. |
| | The big advantage of ordering our made-to-order proteins in comparison to ordering custom |
| | made proteins from other companies is that there is no financial obligation in case the protein |
| | cannot be expressed or purified. |
| | In the unlikely event that the protein cannot be expressed or purified we do not charge anything |
| | (other companies might charge you for any performed steps in the expression process for |
| | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression |
| | experiments or purification optimization). |
| | When you order this made-to-order protein you will only pay upon receival of the correctly |
| | folded protein. With no financial risk on your end you can rest assured that our experienced |
| | protein experts will do everything to make sure that you receive the protein you ordered. |
| | The concentration of our recombinant proteins is measured using the absorbance at 280nm. |
| | The protein's absorbance will be measured in several dilutions and is measured against its |
| | specific reference buffer. |
| | The concentration of the protein is calculated using its specific absorption coefficient. We use |
| | the Expasy's protparam tool to determine the absorption coefficient of each protein. |
| Purification: | Two step purification of proteins expressed in bacterial culture: |
| | 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE |
| | Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot. |
| Purity: | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot. |
| Sterility: | 0.22 µm filtered |
| Endotoxin Level: | Endotoxin has not been removed. Please contact us if you require endotoxin removal. |
| Grade: | Crystallography grade |
| Target Details | |
| Target: | PRKAG1 |

Background: AMP/ATP-binding subunit of AMP-activated protein kinase (AMPK), an energy sensor protein

Prkag1 (PRKAG1 Products)

Alternative Name:

| | kinase that plays a key role in regulating cellular energy metabolism. In response to reduction of |
|---------------------|---|
| | intracellular ATP levels, AMPK activates energy-producing pathways and inhibits energy- |
| | consuming processes: inhibits protein, carbohydrate and lipid biosynthesis, as well as cell |
| | growth and proliferation. AMPK acts via direct phosphorylation of metabolic enzymes, and by |
| | longer-term effects via phosphorylation of transcription regulators. Also acts as a regulator of |
| | cellular polarity by remodeling the actin cytoskeleton, probably by indirectly activating myosin. |
| | Gamma non-catalytic subunit mediates binding to AMP, ADP and ATP, leading to activate or |
| | inhibit AMPK: AMP-binding results in allosteric activation of alpha catalytic subunit (PRKAA1 or |
| | PRKAA2) both by inducing phosphorylation and preventing dephosphorylation of catalytic |
| | subunits. ADP also stimulates phosphorylation, without stimulating already phosphorylated |
| | catalytic subunit. ATP promotes dephosphorylation of catalytic subunit, rendering the AMPK |
| | enzyme inactive (By similarity). {ECO:0000250}. |
| Molecular Weight: | 38.5 kDa Including tag. |
| UniProt: | 054950 |
| Pathways: | AMPK Signaling, Regulation of Carbohydrate Metabolic Process, Warburg Effect |
| Application Details | |
| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies |
| | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though. |
| Comment: | Protein has not been tested for activity yet. In cases in which it is highly likely that the |
| | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher |
| | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible |
| | options with you in detail to assure that you receive your protein of interest. |
| Restrictions: | For Research Use only |
| | |

| Format: | Liquid |
|------------------|--|
| Buffer: | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
