CBFA2T3 Protein (AA 1-620) (His tag)

Image

Go to Product page

Overview

Quantity:	1 mg
Target:	CBFA2T3
Protein Characteristics:	AA 1-620
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CBFA2T3 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

Product Details

Sequence:

Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a

Product Details special request, please contact us. Characteristics: • Made in Germany - from design to production - by highly experienced protein experts. · Mouse Cbfa2t3 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. • State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified. In the unlikely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization). When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer. The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein. Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells: 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

Grade: Crystallography grade

0.22 µm filtered

Protein is endotoxin free.

Purity:

Sterility:

Endotoxin Level:

>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Target Details

Target:	CBFA2T3
Alternative Name:	Cbfa2t3 (CBFA2T3 Products)
Background:	Transcriptional corepressor which facilitates transcriptional repression via its association with
	DNA-binding transcription factors and recruitment of other corepressors and histone-modifying
	enzymes. Can repress the expression of MMP7 in a ZBTB33-dependent manner. Reduces the
	protein levels and stability of the transcriptinal regulator HIF1A, interacts with EGLN1 and
	promotes the HIF1A prolyl hydroxylation-dependent ubiquitination and proteasomal
	degradation pathway. Contributes to inhibition of glycolysis and stimulation of mitochondrial
	respiration by down-regulating the expression of glycolytic genes including PFKFB3, PFKFB4,
	PDK1, PFKP, LDHA and HK1 which are direct targets of HIF1A (By similarity). Regulates the
	proliferation and the differentiation of erythroid progenitors by repressing the expression of
	TAL1 target genes (PubMed:16407974). Plays a role in granulocyte differentiation
	(PubMed:15231665). {ECO:0000250 UniProtKB:075081, ECO:0000269 PubMed:11533236,
	ECO:0000269 PubMed:15231665, ECO:0000269 PubMed:16407974}.
Molecular Weight:	69.0 kDa Including tag.
