

Datasheet for ABIN3131855 TLK2 Protein (AA 1-718) (Strep Tag)

Overview

Quantity:	250 µg
Target:	TLK2
Protein Characteristics:	AA 1-718
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This TLK2 protein is labelled with Strep Tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Brand:	AliCE®
Sequence:	MMEELHSLDP RRQELLEARF TGVGVSKGPL NSESSNQSLC SVGSLSDKEV ETPEKKQNDQ
	RNRKRKAEPY DTSQGKGTPR GHKISDYFER RAEQPLYGLD GSAAKEASEE QSALPTLMSV

Sequence without tag. The proposed Strep-Tag is based on experience s with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.

Characteristics: Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:

One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).

Product Details

 Purity:
 > 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).

 Grade:
 custom-made

Target Details

Target:	TLK2
Alternative Name:	TIk2 (TLK2 Products)
Background:	Serine/threonine-protein kinase tousled-like 2 (EC 2.7.11.1) (PKU-alpha) (Tousled-like kinase
	2),FUNCTION: Serine/threonine-protein kinase involved in the process of chromatin assembly
	and probably also DNA replication, transcription, repair, and chromosome segregation (By
	similarity). Phosphorylates the chromatin assembly factors ASF1A and ASF1B (By similarity).
	Phosphorylation of ASF1A prevents its proteasome-mediated degradation, thereby enhancing
	chromatin assembly (By similarity). Negative regulator of amino acid starvation-induced
	autophagy (By similarity). {ECO:0000250 UniProtKB:Q86UE8}., FUNCTION: Testis-specific
	isoforms may play a role in spermatogenesis. Highly expressed in embryos throughout
	development. {ECO:0000269 PubMed:10092119}.
Molecular Weight:	82.3 kDa
UniProt:	055047
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies

Restrictions:

For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
