_						
0	V	0	r٧	/[	$\Theta$	M

Quantity:	1 mg
Target:	DPM1
Protein Characteristics:	AA 2-260
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This DPM1 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

Product Details	
Sequence:	ASTGASRSLA ASPRPPQGRS SRQDKYSVLL PTYNERENLP LIVWLLVKSF SESAINYEII
	IIDDGSPDGT REVAEQLAEI YGPDRILLRP REKKLGLGTA YIHGIKHATG NYVIIMDADL
	SHHPKFIPEF IRKQKEGNFD IVSGTRYKGN GGVYGWDLKR KIISRGANFI TQILLRPGAS
	DLTGSFRLYR KEVLQKLIEK CVSKGYVFQM EMIVRARQMN YTIGEVPISF VDRVYGESKL
	GGNEIVSFLK GLLTLFATT
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Mouse Dpm1 Protein (raised in E. Coli) purified by multi-step, protein-specific process to
	ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our

experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

In the unlikely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).

When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered.

The concentration of our recombinant proteins is measured using the absorbance at 280nm.

The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.

The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

#### Purification:

Two step purification of proteins expressed in bacterial culture:

- 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
- Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot

Purity:

>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Sterility:

0.22 um filtered

Endotoxin Level:

Endotoxin has not been removed. Please contact us if you require endotoxin removal.

Grade:

Crystallography grade

#### Target Details

Target:	DPM1
Alternative Name:	Dpm1 (DPM1 Products)
Background:	Transfers mannose from GDP-mannose to dolichol monophosphate to form dolichol
	phosphate mannose (Dol-P-Man) which is the mannosyl donor in pathways leading to N-

### **Target Details**

Expiry Date:

idylinositol membrane anchoring, and O-mannosylation of dolichol-phosphate mannose (DPM) synthase complex.
ted above we expect the protein to work for functional studies een tested for functional studies yet we cannot offer a gurantee
factivity yet. In cases in which it is highly likely that the fault tag will be insoluble our protein lab may suggest a higher ag) instead to increase solubility. We will discuss all possible are that you receive your protein of interest.
0% glycerol. pH value is at the discretion of the manufacturer.
es.
