

# Datasheet for ABIN3131959 **GRK6 Protein (AA 1-576) (Strep Tag)**

#### Overview

Quantity:	250 μg
Target:	GRK6
Protein Characteristics:	AA 1-576
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This GRK6 protein is labelled with Strep Tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA

Product Details	
Brand:	AliCE®
Sequence:	MELENIVANT VLLKAREGGG GNRKGKSKKW RQMLQFPHIS QCEELRLSLE RDYHSLCERQ
	PIGRLLFREF CATRPELTRC TAFLDGVSEY EVTPDEKRKA CGRRLMQNFL SHTGPDLIPE
	VPRQLVSNCA QRLEQGPCKD LFQELTRLTH EYLSTAPFAD YLDSIYFNRF LQWKWLERQP
	VTKNTFRQYR VLGKGGFGEV CACQVRATGK MYACKKLEKK RIKKRKGEAM ALNEKQILEK
	VNSRFVVSLA YAYETKDALC LVLTLMNGGD LKFHIYHMGQ AGFPEARAVF YAAEICCGLE
	DLHRERIVYR DLKPENILLD DHGHIRISDL GLAVHVPEGQ TIKGRVGTVG YMAPEVVRNE
	RYTFSPDWWA LGCLLYEMIA GQSPFQQRKK KIKREEVERL VKEVAEEYTD RFSSQARSLC
	SQLLSKDPAE RLGCRGGGAR EVKEHPLFKK LNFKRLGAGM LEPPFKPDPQ AIYCKDVLDI
	EQFSTVKGVD LEPTDQDFYQ KFATGSVSIP WQNEMVETEC FQELNVFGLD GSVPPDLDWK
	GQPTAPPKKG LLQRLFSRQD CCGNCSDSEE ELPTRL
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expres

## system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.

#### Characteristics:

#### Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- · The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

## **Target Details**

Target:	GRK6
Alternative Name:	Grk6 (GRK6 Products)
Background:	G protein-coupled receptor kinase 6 (EC 2.7.11.16) (G protein-coupled receptor kinase
	GRK6),FUNCTION: Specifically phosphorylates the activated forms of G protein-coupled
	receptors. Such receptor phosphorylation initiates beta-arrestin-mediated receptor
	desensitization, internalization, and signaling events leading to their desensitization. Seems to
	be involved in the desensitization of D2-like dopamine receptors in striatum and chemokine
	receptor CXCR4 which is critical for CXCL12-induced cell chemotaxis (By similarity).
	Phosphorylates rhodopsin (RHO) (in vitro) and a non G-protein-coupled receptor, LRP6 during
	Wnt signaling (in vitro) (By similarity). {ECO:0000250, ECO:0000269 PubMed:12032308,
	ECO:0000269 PubMed:12718862, ECO:0000269 PubMed:14634128}.
Molecular Weight:	66.0 kDa
UniProt:	070293
Pathways:	Myometrial Relaxation and Contraction, Regulation of G-Protein Coupled Receptor Protein
	Signaling, CXCR4-mediated Signaling Events, Negative Regulation of Transporter Activity
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational
	modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional
	components needed for protein production (amino acids, cofactors, etc.) are added to produc
	something that functions like a cell, but without the constraints of a living system - all that's
	needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.  Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b>
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
