## Datasheet for ABIN3132363 C3 Protein (AA 569-666) (His tag)

Image

#### Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | C3   |
| Protein Characteristics:      | AA 569-666   |
| Origin:                       | Mouse  |
| Source:                       | Escherichia coli (E. coli)   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This C3 protein is labelled with His tag.  |
| Application:                  | Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)   |
| Product Details               |  |
| Sequence:                     | PRDNHLAPGQ QTTLRIEGNQ GARVGLVAVD KGVFVLNKKN KLTQSKIWDV VEKADIGCTP  |
|                               | GSGKNYAGVF MDAGLAFKTS QGLQTEQRAD LECTKPAA  |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a   |
|                               | special request, please contact us.  |
| Characteristics:              | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse C3 Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul> |
|                               | • State-of-the-art algorithm used for plasmid design (Gene synthesis).   |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our  |
|                               | experts in the lab will ensure that you receive a correctly folded protein.  |
|                               | The big advantage of ordering our made-to-order proteins in comparison to ordering custom  |
|                               |  |

| Product Details  |  |
|------------------|--|
|                  | cannot be expressed or purified.   |
|                  | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                  | (other companies might charge you for any performed steps in the expression process for  |
|                  | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                  | experiments or purification optimization).   |
|                  | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                  | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                  | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                  | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                  | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                  | specific reference buffer.   |
|                  | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                  | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:    | Two step purification of proteins expressed in bacterial culture:  |
|                  | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol> |
|                  | 2. Protein containing fractions of the best purification are subjected to second purification step<br>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br>Western blot.  |
| Purity:          | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:       | 0.22 μm filtered   |
| Endotoxin Level: | Endotoxin has not been removed. Please contact us if you require endotoxin removal.  |
| Grade:           | Crystallography grade  |

### Target Details

| Target:           | C3   |
|-------------------|--|
| Alternative Name: | C3 (C3 Products)   |
| Background:       | C3 plays a central role in the activation of the complement system. Its processing by C3         |
|                   | convertase is the central reaction in both classical and alternative complement pathways. After  |
|                   | activation C3b can bind covalently, via its reactive thioester, to cell surface carbohydrates or |
|                   | immune aggregates., Derived from proteolytic degradation of complement C3, C3a                   |
|                   | anaphylatoxin is a mediator of local inflammatory process. In chronic inflammation, acts as a    |

All rights reserved.

| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies  |
|---------------------|--|
| Application Details |  |
| Pathways:           | Complement System, Regulation of Leukocyte Mediated Immunity, Positive Regulation of Immune Effector Process, Regulation of G-Protein Coupled Receptor Protein Signaling |
| UniProt:            | P01027   |
| Molecular Weight:   | 11.4 kDa Including tag.  |
|                     | and recycling of C5AR2.  |
|                     | pathways. Ligand for C5AR2. Promotes the phosphorylation, ARRB2-mediated internalization   |
|                     | Appears to stimulate TG synthesis via activation of the PLC, MAPK and AKT signaling  |
|                     | transport in adipocytes, regulating fat storage and playing a role in postprandial TG clearance.   |
|                     | stimulating protein: adipogenic hormone that stimulates triglyceride (TG) synthesis and glucose  |
|                     | as a chemoattractant for neutrophils in chronic inflammation. {ECO:0000250}., Acylation  |
|                     | leukocytes. The short isoform has B-cell stimulatory activity. {ECO:0000250}., C3-beta-c: Acts   |
|                     | increases vascular permeability and causes histamine release from mast cells and basophilic  |
|                     | chemoattractant for neutrophils (By similarity). It induces the contraction of smooth muscle,  |

| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies |
|--------------------|---|
|                    | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
|                    | though.   |
| Comment:           | Protein has not been tested for activity yet. In cases in which it is highly likely that the      |
|                    | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher   |
|                    | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible  |
|                    | options with you in detail to assure that you receive your protein of interest.                   |
| Restrictions:      | For Research Use only   |

## Handling

| Format:          | Liquid   |
|------------------|--|
| Buffer:          | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles.   |
| Storage:         | -80 °C   |
| Storage Comment: | Store at -80°C.  |
| Expiry Date:     | Unlimited (if stored properly)   |
