Datasheet for ABIN3132626 EGR2 Protein (AA 1-470) (His tag)

Image

Overview

Quantity:	1 mg
Target:	EGR2
Protein Characteristics:	AA 1-470
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This EGR2 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

Product Details

Grade:	Crystallography grade
Endotoxin Level:	Protein is endotoxin free.
Sterility:	0.22 µm filtered
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
r u mcation.	 I wo step purification of proteins expressed in baculovirus infected SF9 insect cells: In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
	specific reference buffer. The concentration of the protein is calculated using its specific absorption coefficient. We use
	The protein's absorbance will be measured in several dilutions and is measured against its

Target Details

Background:	Sequence-specific DNA-binding transcription factor. Binds to two specific DNA sites located in
	the promoter region of HOXA4. Binds to the promoter region of ERBB2. May play a role in the
	regulation of hindbrain segmentation, might act in combination with the Hox network to specify
	odd and even rhombomeres, and might participate in the control of the expression of some of
	the homeobox containing genes. {ECO:0000269 PubMed:1674431,
	ECO:0000269 PubMed:17938205, ECO:0000269 PubMed:1969796}., E3 SUMO-protein ligase
	helping SUMO1 conjugation to its coregulators NAB1 and NAB2, whose sumoylation down-
	regulates EGR2 own transcriptional activity. {ECO:0000250}.
Molecular Weight:	50.8 kDa Including tag.
UniProt:	P08152
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible

options with you in detail to assure that you receive your protein of interest.

Restrictions: For Research Use only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
