antibodies

# Datasheet for ABIN3132818 SLC3A2 Protein (AA 100-526) (His tag)

#### Overview

Quantity:	1 mg
Target:	SLC3A2
Protein Characteristics:	AA 100-526
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This SLC3A2 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

### Product Details

Sequence:	APRCRELPVQ RWWHKGALYR IGDLQAFVGR DAGGIAGLKS HLEYLSTLKV KGLVLGPIHK
	NQKDEINETD LKQINPTLGS QEDFKDLLQS AKKKSIHIIL DLTPNYQGQN AWFLPAQADI
	VATKMKEALS SWLQDGVDGF QFRDVGKLMN APLYLAEWQN ITKNLSEDRL LIAGTESSDL
	QQIVNILEST SDLLLTSSYL SNSTFTGERT ESLVTRFLNA TGSQWCSWSV SQAGLLADFI
	PDHLLRLYQL LLFTLPGTPV FSYGDELGLQ GALPGQPAKA PLMPWNESSI FHIPRPVSLN
	MTVKGQNEDP GSLLTQFRRL SDLRGKERSL LHGDFHALSS SPDLFSYIRH WDQNERYLVV
	LNFRDSGRSA RLGASNLPAG ISLPASAKLL LSTDSARQSR EEDTSLKLEN LSLNPYEGLL LQFPFVA
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Mouse Slc3a2 Protein (raised in E. Coli) purified by multi-step, protein-specific process to
	ensure crystallization grade.

Target Details Target:	SLC3A2
Grade:	Crystallography grade
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Sterility:	0.22 µm filtered
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Purification:	<ul> <li>Two step purification of proteins expressed in bacterial culture:</li> <li>1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> <li>2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ul>
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified. In the unlikely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization). When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer. The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.
	<ul> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> <li>This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.</li> </ul>

Target Details	
Background:	Required for the function of light chain amino-acid transporters. Involved in sodium-
	independent, high-affinity transport of large neutral amino acids such as phenylalanine,
	tyrosine, leucine, arginine and tryptophan. Involved in guiding and targeting of LAT1 and LAT2
	to the plasma membrane. When associated with SLC7A6 or SLC7A7 acts as an
	arginine/glutamine exchanger, following an antiport mechanism for amino acid transport,
	influencing arginine release in exchange for extracellular amino acids. Plays a role in nitric oxide
	synthesis in human umbilical vein endothelial cells (HUVECs) via transport of L-arginine.
	Required for normal and neoplastic cell growth. When associated with SLC7A5/LAT1, is also
	involved in the transport of L-DOPA across the blood-brain barrier, and that of thyroid hormones
	triiodothyronine (T3) and thyroxine (T4) across the cell membrane in tissues such as placenta.
	Involved in the uptake of methylmercury (MeHg) when administered as the L-cysteine or D,L-
	homocysteine complexes, and hence plays a role in metal ion homeostasis and toxicity. When
	associated with SLC7A5 or SLC7A8, involved in the cellular activity of small molecular weight
	nitrosothiols, via the stereoselective transport of L-nitrosocysteine (L-CNSO) across the
	transmembrane. Together with ICAM1, regulates the transport activity LAT2 in polarized
	intestinal cells, by generating and delivering intracellular signals. When associated with SLC7A5
	plays an important role in transporting L-leucine from the circulating blood to the retina across
	the inner blood-retinal barrier. {ECO:0000269 PubMed:10391915,
	ECO:0000269 PubMed:11011012, ECO:0000269 PubMed:9915839}.
Molecular Weight:	48.5 kDa Including tag.
UniProt:	P10852
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
