DAIKKKLTGI KHELQANCYE EVKDRCTLAE KLGGSAVISL EGKPL Sequence without tag. Tag location is at the discretion of the manufacturer. If you has special request, please contact us. Characteristics: Made in Germany - from design to production - by highly experienced protein experts. Mouse Cfl1 Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. experts in the lab will ensure that you receive a correctly folded protein.		
Protein Characteristics: AA 2-166 Origin: Mouse Source: Escherichia coli (E. coli) Protein Type: Recombinant Purification tag / Conjugate: This Cofilin protein is labelled with His tag. Application: Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys) Product Details Sequence: ASGVAVSDGV IKVFNDMKVR KSSTPEEVKK RKKAVLFCLS EDKKNIILEE GKEILVGDVG QTVDDPYTTF VKMLPDKDCR YALYDATYET KESKKEDLVF IFWAPENAPL KSKMIYASSK DAIKKKLTGI KHELQANCYE EVKDRCTLAE KLGGSAVISL EGKPL Sequence without tag. experts in the lab will ensure that you receive a correctly folded protein.	Characteristics:	ensure crystallization grade.
The big advantage of ordering our made-to-order proteins in comparison to ordering cu		This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.
		The big advantage of ordering our made-to-order proteins in comparison to ordering custom

made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

In the unlikely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).

When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered.

The concentration of our recombinant proteins is measured using the absorbance at 280nm.

The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.

The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:

Two step purification of proteins expressed in bacterial culture:

- 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
- 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

Purity:

>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Sterility:

0.22 µm filtered

Endotoxin Level:

Endotoxin has not been removed. Please contact us if you require endotoxin removal.

Grade:

Crystallography grade

Target Details

Target:	Cofilin (CFL1)	
Alternative Name:	Cfl1 (CFL1 Products)	
Background:	Binds to F-actin and exhibits pH -sensitive F-actin depolymerizing activity (PubMed:11809832).	
	Regulates actin cytoskeleton dynamics. Important for normal progress through mitosis and	
	normal cytokinesis. Plays a role in the regulation of cell morphology and cytoskeletal	
	organization. Required for the up-regulation of atypical chemokine receptor ACKR2 from	

Target Details

	endosomal compartment to cell membrane, increasing its efficiency in chemokine uptake and		
	degradation (By similarity). Required for neural tube morphogenesis and neural crest cell		
	migration (PubMed:15649475). {ECO:0000250 UniProtKB:P23528,		
	ECO:0000269 PubMed:11809832, ECO:0000269 PubMed:15649475}.		
Molecular Weight:	19.4 kDa Including tag.		
UniProt:	P18760		
Pathways:	Regulation of Cell Size, Tube Formation, Protein targeting to Nucleus, CXCR4-mediated		
	Signaling Events		
Application Details			
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies		
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee		
	though.		
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the		
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher		
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible		
	options with you in detail to assure that you receive your protein of interest.		
Restrictions:	For Research Use only		
Handling			
Format:	Liquid		
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.		
Handling Advice:	Avoid repeated freeze-thaw cycles.		
Storage:	-80 °C		
Storage Comment:	Store at -80°C.		
Expiry Date:	Unlimited (if stored properly)
