# Datasheet for ABIN3133374 PCGF2 Protein (AA 1-342) (His tag)

Image

#### Overview

Quantity:	1 mg	
Target:	PCGF2	
Protein Characteristics:	AA 1-342	
Origin:	Mouse	
Source:	Insect Cells	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This PCGF2 protein is labelled with His tag.	
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)	

### Product Details

Sequence:	MHRTTRIKIT ELNPHLMCAL CGGYFIDATT IVECLHSFCK TCIVRYLETN KYCPMCDVQV HKTRPLLSIR SDKTLQDIVY KLVPGLFKDE MKRRRDFYAA YPLTEVPNGS NEDRGEVLEQ EKGALGDDEI VSLSIEFYEG VRDREEKKNL TENGDGDKEK TGVRFLRCPA AMTVMHLAKF LRNKMDVPSK YKVEILYEDE PLKEYYTLMD IAYIYPWRRN GPLPLKYRVQ PACKRLTLPT VPTPSEGTNT SGASECESVS DKAPSPATLP ATSSSLPSPA TPSHGSPSSH GPPATHPTSP TPPSTAAGTT TATNGGTSNC LQTPSSTSRG RKMTVNGAPC PP Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Pcgf2 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	PCGF2
Alternative Name:	Pcgf2 (PCGF2 Products)
Background:	Transcriptional repressor. Binds specifically to the DNA sequence 5'-GACTNGACT-3'. Has

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3133374 | 09/11/2023 | Copyright antibodies-online. 	tumor suppressor activity. May play a role in control of cell proliferation and/or neural cell		
	development. Regulates proliferation of early T progenitor cells by maintaining expression of		
	HES1. Also plays a role in antero-posterior specification of the axial skeleton and negative		
	regulation of the self-renewal activity of hematopoietic stem cells. Component of a Polycomb		
	group (PcG) multiprotein PRC1-like complex, a complex class required to maintain the		
	transcriptionally repressive state of many genes, including Hox genes, throughout development.		
	PcG PRC1 complex acts via chromatin remodeling and modification of histones, it mediates		
	monoubiquitination of histone H2A 'Lys-119', rendering chromatin heritably changed in its		
	expressibility. Is not functionally redundant with BMI1, unlike BMI1 does not stimulate the E3		
	ubiquitin-protein ligase activity in a reconstituted PRC1-like complex.

	ECO:0000269 PubMed:15728456, ECO:0000269 PubMed:16359901,		
	ECO:0000269 PubMed:8625838}.		
Molecular Weight:	38.7 kDa Including tag.		
UniProt:	P23798		
Pathways:	Chromatin Binding		

## Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
