Datasheet for ABIN3133547 BRAF Protein (AA 2-804) (His tag)

Image

Overview

| Quantity: | 1 mg |
|-------------------------------|--|
| Target: | BRAF |
| Protein Characteristics: | AA 2-804 |
| Origin: | Mouse |
| Source: | Insect Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This BRAF protein is labelled with His tag. |
| Application: | SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys) |

| Characteristics: Made in Germany - from design to production - by highly experienced protein ex Mouse Braf Protein (raised in Insect Cells) purified by multi-step, protein-specifiensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your | ic process to |
| Mouse Braf Protein (raised in Insect Cells) purified by multi-step, protein-specif ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your | ic process to |
| | order. Our |
| | |
| experts in the lab will ensure that you receive a correctly folded protein. | |
| The big advantage of ordering our made-to-order proteins in comparison to order | ing custom |
| made proteins from other companies is that there is no financial obligation in cas | e the protein |
| cannot be expressed or purified. | |
| In the unlikely event that the protein cannot be expressed or purified we do not ch | arge anything |
| (other companies might charge you for any performed steps in the expression pro | ocess for |
| custom-made proteins, e.g. fees might apply for the expression plasmid, the first | expression |
| experiments or purification optimization). | |
| When you order this made-to-order protein you will only pay upon receival of the c | correctly |
| folded protein. With no financial risk on your end you can rest assured that our ex | perienced |
| protein experts will do everything to make sure that you receive the protein you or | dered. |
| The concentration of our recombinant proteins is measured using the absorbance | e at 280nm. |
| The protein's absorbance will be measured in several dilutions and is measured a | gainst its |
| specific reference buffer. | |
| The concentration of the protein is calculated using its specific absorption coeffic | ient. We use |
| the Expasy's protparam tool to determine the absorption coefficient of each prote | in. |
| Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cel | ls: |
| In a first purification step, the protein is purified from the cleared cell lysate usin different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. fractions are analyzed by SDS-PAGE. Protein containing fractions of the best purification are subjected to second put through size evolution chromategraphy. Eluste fractions are analyzed by SDS-I | Eluate rification step |
| through size exclusion chromatography. Eluate fractions are analyzed by SDS-F Western blot. | |
| Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western | Blot. |
| Sterility: 0.22 µm filtered | |
| Endotoxin Level: Protein is endotoxin free. | |

Product Details

Grade:

Crystallography grade

Target Details

| Target: | BRAF |
|-------------------|--|
| Alternative Name: | Braf (BRAF Products) |
| Background: | Involved in the transduction of mitogenic signals from the cell membrane to the nucleus. May play a role in the postsynaptic responses of hippocampal neuron (By similarity). {ECO:0000250}. |
| Molecular Weight: | 89.6 kDa Including tag. |
| UniProt: | P28028 |
| Pathways: | MAPK Signaling, RTK Signaling, Neurotrophin Signaling Pathway, Ribonucleoprotein Complex Subunit Organization, Hepatitis C, Autophagy |

Application Details

| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though. |
|--------------------|---|
| Comment: | Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest. |
| Restrictions: | For Research Use only |

Handling

| Format: | Liquid |
|------------------|--|
| Buffer: | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
| Expiry Date: | Unlimited (if stored properly) |
