antibodies

Datasheet for ABIN3133559 GJA4 Protein (AA 232-333) (His tag)

Overview

 ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering custom 		
Protein Characteristics:AA 232-333Origin:MouseSource:Insect CellsProtein Type:RecombinantPurification tag / Conjugate:This GJA4 protein is labelled with His tag.Application:Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)Product DetailsECRCVSREIK ARRDHDARPA QGSASDPYPE QVFFYLPMGE GPSSPPCPTY NGLSSTEQNW ANLTTEERLT SSRPPFVNT APQGGRKSPS RPNSSASKKQ YV Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us.Characteristics:• Made in Germany - from design to production - by highly experienced protein experts. • Mouse Gja4 Protein (raised in Insect Cells) purified by multi-step, protein-specific process a ensure crystallization grade. • State-of-the-art algorithm used for plasmid design (Gene synthesis).This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering custom	Quantity:	1 mg
Origin:MouseSource:Insect CellsProtein Type:RecombinantPurification tag / Conjugate:This GJA4 protein is labelled with His tag.Application:Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)Product DetailsCRCVSREIK ARRDHDARPA QGSASDPYPE QVFFYLPMGE GPSSPPCPTY NGLSSTEQNW ANLTTEERLT SSRPPFYNT APQGGRKSPS RPNSSASKKQ YV Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us.Characteristics:• Made in Germany - from design to production - by highly experienced protein experts. • Mouse Gja4 Protein (raised in Insect Cells) purified by multi-step, protein-specific process I ensure crystallization grade. • State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. Product Details	
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	

Target:	GJA4
Alternative Name:	Gja4 (GJA4 Products)
Background:	One gap junction consists of a cluster of closely packed pairs of transmembrane channels, the connexons, through which materials of low MW diffuse from one cell to a neighboring cell.
Molecular Weight:	12.2 kDa Including tag.
UniProt:	P28235

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/3 | Product datasheet for ABIN3133559 | 09/11/2023 | Copyright antibodies-online. Target Details	
Pathways:	Cell-Cell Junction Organization
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
