## Datasheet for ABIN3133983 ID3 Protein (AA 1-119) (His tag)

Image

## Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | ID3  |
| Protein Characteristics:      | AA 1-119   |
| Origin:                       | Mouse  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This ID3 protein is labelled with His tag.   |
| Application:                  | ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)   |
| Product Details               |  |
| Sequence:                     | MKALSPVRGC YEAVCCLSER SLAIARGRGK SPSTEEPLSL LDDMNHCYSR LRELVPGVPR  |
|                               | GTQLSQVEIL QRVIDYILDL QVVLAEPAPG PPDGPHLPIQ TAELTPELVI SKDKRSFCH   |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a   |
|                               | special request, please contact us.  |
| Characteristics:              | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Id3 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul> |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.  |
|                               | The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein  |

| Product Details  |  |
|------------------|--|
|                  | cannot be expressed or purified.   |
|                  | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                  | (other companies might charge you for any performed steps in the expression process for  |
|                  | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                  | experiments or purification optimization).   |
|                  | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                  | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                  | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                  | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                  | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                  | specific reference buffer.   |
|                  | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                  | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:    | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:  |
|                  | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol> |
|                  | <ol> <li>Protein containing fractions of the best purification are subjected to second purification step<br/>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br/>Western blot.</li> </ol>                           |
| Purity:          | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:       | 0.22 µm filtered   |
| Endotoxin Level: | Protein is endotoxin free.   |
| Grade:           | Crystallography grade  |

## Target Details

| Target:           | ID3   |
|-------------------|---|
| Alternative Name: | Id3 (ID3 Products)  |
| Background:       | Transcriptional regulator (lacking a basic DNA binding domain) which negatively regulates the       |
|                   | basic helix-loop-helix (bHLH) transcription factors by forming heterodimers and inhibiting their    |
|                   | DNA binding and transcriptional activity. Implicated in regulating a variety of cellular processes, |
|                   | including cellular growth, senescence, differentiation, apoptosis, angiogenesis, and neoplastic     |
|                   | transformation. Involved in myogenesis by inhibiting skeletal muscle and cardiac myocyte            |

|                     | differentiation and promoting muscle precursor cells proliferation. Inhibits the binding of E2A-<br>containing protein complexes to muscle creatine kinase E-box enhancer. Regulates the |
|---------------------|--|
|                     | circadian clock by repressing the transcriptional activator activity of the CLOCK-ARNTL/BMAL1  |
|                     | heterodimer. {EC0:0000269 PubMed:19217292, EC0:0000269 PubMed:22862948,  |
|                     | ECO:0000269 PubMed:23824195}.  |
|                     |  |
| Molecular Weight:   | 14.0 kDa Including tag.  |
| UniProt:            | P41133   |
|                     |  |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies  |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee  |
|                     | though.  |
| Comment:            | Protein has not been tested for activity yet. In cases in which it is highly likely that the   |
|                     | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher  |
|                     | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible   |
|                     | options with you in detail to assure that you receive your protein of interest.  |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.   |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.   |
| Storage:            | -80 °C   |

Storage Comment: Store at -80°C.

Expiry Date: Unlimited (if stored properly)

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
