Datasheet for ABIN3134016 ELK1 Protein (AA 1-429) (His tag)

Image

Overview

Quantity:	1 mg
Target:	ELK1
Protein Characteristics:	AA 1-429
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ELK1 protein is labelled with His tag.
Application:	Western Blotting (WB), ELISA, Crystallization (Crys), SDS-PAGE (SDS)

Product Details

Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Elk1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to
	special request, please contact us.
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a

ensure crystallization grade. • State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering or made proteins from other companies is that there is no financial obligation in case the cannot be expressed or purified. In the unlikely event that the protein cannot be expressed or purified we do not charger (other companies might charge you for any performed steps in the expression process custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).	custom e protein e anything ss for ression

When you order this made-to-order protein you will only pay upon receival of the corre	1CTIV
folded protein. With no financial risk on your end you can rest assured that our experi-	-
protein experts will do everything to make sure that you receive the protein you order	
The concentration of our recombinant proteins is measured using the absorbance at	
The protein's absorbance will be measured in several dilutions and is measured agair	
specific reference buffer.	51115
The concentration of the protein is calculated using its specific absorption coefficient	Mausa
the Expasy's protparam tool to determine the absorption coefficient of each protein.	. we use
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
 In a first purification step, the protein is purified from the cleared cell lysate using the different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluc fractions are analyzed by SDS-PAGE. 	
 Protein containing fractions of the best purification are subjected to second purific through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAG Western blot. 	
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blo	t.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

Elk1 (ELK1 Products)

Target Details	
Background:	Transcription factor that binds to purine-rich DNA sequences. Forms a ternary complex with SRF and the ETS and SRF motifs of the serum response element (SRE) on the promoter region of immediate early genes such as FOS and IER2 (By similarity). Induces target gene transcription upon JNK-signaling pathway stimulation (By similarity). {ECO:0000250 UniProtKB:A4GTP4, ECO:0000250 UniProtKB:P19419}.
Molecular Weight:	46.2 kDa Including tag.
UniProt:	P41969
Pathways:	MAPK Signaling, Neurotrophin Signaling Pathway, Activation of Innate immune Response, Toll- Like Receptors Cascades, Signaling of Hepatocyte Growth Factor Receptor, BCR Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies

	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
