## EGR3 Protein (AA 1-387) (Strep Tag)

_						
	V	$\triangle$	r۱	/1	$\triangle$	Λ/
	' V '		ΙV			v v

Quantity:	250 μg
Target:	EGR3
Protein Characteristics:	AA 1-387
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This EGR3 protein is labelled with Strep Tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA

Product Details	
Brand:	AliCE®
Sequence:	MTGKLAEKLP VTMSSLLNQL PDNLYPEEIP SALNLFSGSS DSVAHYNQMA TENVMDIGLT
	NEKPNPELSY SSSFQPAPGN KTVTYLGKFA FDSPSNWCQD NIISLMSAGI LGVPPASGAL
	STQTSTASMV QPPQGDVEAM YPALPPYSNC GDLYSEPVSF HDPQGNPGLA YSPQDYQSAK
	PALDSNLFPM IPDYNLYHHP NDMGSIPEHK PFQGMDPIRV NPPPITPLET IKAFKDKQIH
	PGFGSLPQPP LTLKPIRPRK YPNRPSKTPL HERPHACPAE GCDRRFSRSD ELTRHLRIHT
	GHKPFQCRIC MRSFSRSDHL TTHIRTHTGE KPFACEFCGR KFARSDERKR HAKIHLKQKE
	KKSEKGGAPS ASSAPTVSLA PVVTTCA
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- · State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- · We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	made-to-order
Target Details	
Target:	EGR3

### **Target Details**

Expiry Date:

on factor involved in			
P43300			
In addition to the applications listed above we expect the protein to work for functional studie as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.			
ate obtained from  ry needed to produce ost-translational  are not required for ninery and the e additional are added to produce system - all that's
