Datasheet for ABIN3134095 SIPA1 Protein (AA 1-1037) (Strep Tag)

Overview

Quantity:	1 mg
Target:	SIPA1
Protein Characteristics:	AA 1-1037
Origin:	Mouse
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This SIPA1 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Sequence:	MWAGGVGSPR RGMAPAPTDD LFARKLRQPA RPPLTPNTFE PRPARGPLLR SGSDAGEVRP

ARLLRVCGQT LPKLGPETAA QMLRSAPKVC VTVLPPDESG RPRRSFSELY MLSLKEPSRR GGPEPVQDET GKLVILPPTK QLLHFCLKDS SSPPGPGDLT EERTEFLRTH NSLSSGSSLS DEAPVLPNTT PDLLLVTTAN PSAPGTDRET PPSQDQSGSP SSHEDTSDSG PELRASILPR TLSLRNSISK IMSEAGSETL EDEWQSISEI ASTCNTILES LSREGQPISE SGDPKEALKC DSEPEPGSLS EKVSHLESML WKLQEDLQRE KADRAALEEE VRSLRHNNQR LLAESESAAT RLLLASKHLG APTTDLA Sequence without tag. The proposed Strep-Tag is based on experience s with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.

Characteristics:

Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALICE® and purified by multi-step, protein-specific process to ensure correct folding and modification.
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

• The concentration of our recombinant proteins is measured using the absorbance at 280nm.

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3134095 | 05/08/2024 | Copyright antibodies-online. 	 The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
	• We use the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in Almost Living Cell-Free Expression System
	(ALICE®):
	1. In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	≥ 80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)

Target Details

Target:	SIPA1
Alternative Name:	Sipa1 (SIPA1 Products)
Background:	Signal-induced proliferation-associated protein 1 (Sipa-1) (GTPase-activating protein Spa-
	1),FUNCTION: GTPase activator for the nuclear Ras-related regulatory proteins Rap1, Rsr1 and
	Ran in vitro, converting them to the putatively inactive GDP-bound state. Affects cell cycle
	progression. {EC0:0000269 PubMed:7799964}.
Molecular Weight:	112.1 kDa
UniProt:	P46062
Pathways:	Response to Water Deprivation
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational
