Datasheet for ABIN3134193 Leptin Receptor Protein (LEPR) (AA 861-1162) (His tag)

Overview

Image

Quantity:	1 mg
Target:	Leptin Receptor (LEPR)
Protein Characteristics:	AA 861-1162
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This Leptin Receptor protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)
Product Details	

Sequence:	SHQRMKKLFW DDVPNPKNCS WAQGLNFQKP ETFEHLFTKH AESVIFGPLL LEPEPISEEI
	SVDTAWKNKD EMVPAAMVSL LLTTPDPESS SICISDQCNS ANFSGSQSTQ VTCEDECQRQ
	PSVKYATLVS NDKLVETDEE QGFIHSPVSN CISSNHSPLR QSFSSSSWET EAQTFFLLSD
	QQPTMISPQL SFSGLDELLE LEGSFPEENH REKSVCYLGV TSVNRRESGV LLTGEAGILC
	TFPAQCLFSD IRILQERCSH FVENNLSLGT SGENFVPYMP QFQTCSTHSH KIMENKMCDL TV
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 special request, please contact us. Made in Germany - from design to production - by highly experienced protein experts.
Characteristics:	
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Lepr Protein (raised in Insect Cells) purified by multi-step, protein-specific process to

	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	Lentin Recentor (LEPR)

Target:	Leptin Receptor (LEPR)
Alternative Name:	Lepr (LEPR Products)
Background:	Receptor for hormone LEP/leptin (Probable) (PubMed:11861497). On ligand binding, mediates LEP central and peripheral effects through the activation of different signaling pathways such

as JAK2/STAT3 and MAPK cascade/FOS (PubMed:10799542, PubMed:25383904,
PubMed:11923481, PubMed:11861497). In the hypothalamus, LEP acts as an appetite-
regulating factor that induces a decrease in food intake and an increase in energy consumption
by inducing anorexinogenic factors and suppressing orexigenic neuropeptides, also regulates
bone mass and secretion of hypothalamo-pituitary-adrenal hormones (PubMed:10660043,
PubMed:12594516). In the periphery, increases basal metabolism, influences reproductive
function, regulates pancreatic beta-cell function and insulin secretion, is pro-angiogenic and
affects innate and adaptive immunity (PubMed:25383904, PubMed:11923481). Control of
energy homeostasis and melanocortin production (stimulation of POMC and full repression of
AgRP transcription) is mediated by STAT3 signaling, whereas distinct signals regulate NPY and
the control of fertility, growth and glucose homeostasis (PubMed:12594516). Involved in the
regulation of counter-regulatory response to hypoglycemia by inhibiting neurons of the
parabrachial nucleus (PubMed:25383904). Has a specific effect on T lymphocyte responses,
differentially regulating the proliferation of naive and memory T-cells. Leptin increases Th1 and
suppresses Th2 cytokine production (PubMed:9732873). {ECO:0000269 PubMed:10660043,

ECO:0000305 PubMed:25232147}., Isoform A: May transport LEP across the blood-brain
barrier. Binds LEP and mediates LEP endocytosis (PubMed:17620316, PubMed:20223942).
Does not induce phosphorylation of and activate STAT3 (PubMed:11923481,
PubMed:20223942). {ECO:0000269 PubMed:11923481, ECO:0000269 PubMed:17620316,
ECO:0000269 PubMed:20223942}., Isoform E: Antagonizes Isoform A and isoform B-mediated
LEP binding and endocytosis. {ECO:0000269 PubMed:17620316}.
34.8 kDa Including tag.

Molecular Weight:	34.8 kDa Including tag.
UniProt:	P48356
Pathways:	JAK-STAT Signaling, AMPK Signaling, Feeding Behaviour

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher

Application Details	
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
