

Datasheet for ABIN3134195 RFX2 Protein (AA 1-717) (Strep Tag)

Overview

Quantity:	250 µg
Target:	RFX2
Protein Characteristics:	AA 1-717
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This RFX2 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Brand:	AliCE®
Sequence:	MQNSEGGADS PASVALRPAA QPMPASPQRV LVQAAGSTPK GTPMQTLTLP RVQPVPPQVQ

	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
aracteristics:	Key Benefits:

Characteristics:

- · Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- · The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:

One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).

Product Details

 Purity:
 > 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).

 Grade:
 custom-made

Target Details

Target:	RFX2
Alternative Name:	Rfx2 (RFX2 Products)
Background:	DNA-binding protein RFX2 (Regulatory factor X 2),FUNCTION: Transcription factor that acts as
	a key regulator of spermatogenesis (PubMed:26248850, PubMed:26162102,
	PubMed:26853561). Acts by regulating expression of genes required for the haploid phase
	during spermiogenesis, such as genes required for cilium assembly and function
	(PubMed:26162102, PubMed:26853561). Recognizes and binds the X-box, a regulatory motif
	with DNA sequence 5'-GTNRCC(0-3N)RGYAAC-3' present on promoters (PubMed:15229132,
	PubMed:26162102). Probably activates transcription of the testis-specific histone gene H1-6
	(PubMed:15229132). {ECO:0000269 PubMed:15229132, ECO:0000269 PubMed:26162102,
	ECO:0000269 PubMed:26248850, ECO:0000269 PubMed:26853561}.
Molecular Weight:	79.2 kDa
UniProt:	P48379

Application Details

Restrictions:

For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
