antibodies

Datasheet for ABIN3134583 KCNAB2 Protein (AA 1-367) (His tag)

Overview

Quantity:	1 mg
Target:	KCNAB2
Protein Characteristics:	AA 1-367
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This KCNAB2 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)

Product Details

Sequence:	MYPESTTGSP ARLSLRQTGS PGMIYSTRYG SPKRQLQFYR NLGKSGLRVS CLGLGTWVTF	
	GGQITDEMAE HLMTLAYDNG INLFDTAEVY AAGKAEVVLG NIIKKKGWRR SSLVITTKIF	
	WGGKAETERG LSRKHIIEGL KASLERLQLE YVDVVFANRP DPNTPMEETV RAMTHVINQG	
	MAMYWGTSRW SSMEIMEAYS VARQFNLIPP ICEQAEYHMF QREKVEVQLP ELFHKIGVGA	
	MTWSPLACGI VSGKYDSGIP PYSRASLKGY QWLKDKILSE EGRRQQAKLK ELQAIAERLG	
	CTLPQLAIAW CLRNEGVSSV LLGASNAEQL MENIGAIQVL PKLSSSIVHE IDSILGNKPY SKKDYRS	
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a	
	special request, please contact us.	
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.	
	Mouse Kcnab2 Protein (raised in Insect Cells) purified by multi-step, protein-specific process	
	to ensure crystallization grade.	
	State-of-the-art algorithm used for plasmid design (Gene synthesis).

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.2. Protein containing fractions of the best purification are subjected to second purification step.
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	KCNAB2
Alternative Name:	Kcnab2 (KCNAB2 Products)

Background: Cytoplasmic potassium channel subunit that modulates the characteristics of the channel-

	forming alpha-subunits (PubMed:8576199). Contributes to the regulation of nerve signaling,	
	and prevents neuronal hyperexcitability (PubMed:11825900, PubMed:21209188). Promotes	
	expression of the pore-forming alpha subunits at the cell membrane, and thereby increases	
	channel activity (By similarity). Promotes potassium channel closure via a mechanism that	
	does not involve physical obstruction of the channel pore (PubMed:8576199). Modulates the	
	functional properties of KCNA4 (By similarity). Modulates the functional properties of KCNA5	
	(PubMed:8576199). Enhances KCNB2 channel activity (PubMed:8824288). Modulates the	
	functional properties of KCNA5 (PubMed:8576199). Binds NADPH and has NADPH-dependent	
	aldoketoreductase activity (By similarity). Has broad substrate specificity and can catalyze the	
	reduction of methylglyoxal, 9,10-phenanthrenequinone, prostaglandin J2, 4-nitrobenzaldehyde,	
	4-nitroacetophenone and 4-oxo-trans-2-nonenal (in vitro) (By similarity).
