()	ve	K\ /		A .
	\cup	1 V/	Щ.	V۷

Quantity:	1 mg	
Target:	CD130/gp130 (IL6ST)	
Protein Characteristics:	AA 640-917	
Origin:	Mouse	
Source:	Escherichia coli (E. coli)	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This CD130/gp130 protein is labelled with His tag.	
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)	
Product Details		
Sequence:	NKRDLIKKHI WPNVPDPSKS HIAQWSPHTP PRHNFNSKDQ MYSDGNFTDV SVVEIEANNK	
	KPCPDDLKSV DLFKKEKVST EGHSSGIGGS SCMSSSRPSI SSNEENESAQ STASTVQYST

Coli) purified by multi-step, protein-specific process to	

experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

In the unlikely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).

When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered.

The concentration of our recombinant proteins is measured using the absorbance at 280nm.

The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.

The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:

Two step purification of proteins expressed in bacterial culture:

- 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
- Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot

Purity:

>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Sterility:

0.22 um filtered

Endotoxin Level:

Endotoxin has not been removed. Please contact us if you require endotoxin removal.

Grade:

Crystallography grade

Target Details

Target:	CD130/gp130 (IL6ST)	
Alternative Name:	Il6st (IL6ST Products)	
Background:	Signal-transducing molecule. The receptor systems for IL6, LIF, OSM, CNTF, IL11, CTF1 and	
	BSF3 can utilize IL6ST for initiating signal transmission. Binding of IL6 to IL6R induces IL6ST	

Handling

Format:

	nomeanienzation and formation of a high animity receptor complex, which activated canad		
	kinases (PubMed:1602143). That causes phosphorylation of IL6ST tyrosine residues which in		
	turn activates STAT3 (PubMed:10661409). Mediates signals which regulate immune response,		
	hematopoiesis, pain control and bone metabolism (PubMed:10661409, PubMed:26255596,		
	PubMed:25057188, PubMed:8552649). Has a role in embryonic development		
	(PubMed:10661409). Does not bind IL6 (By similarity). Essential for survival of motor and		
	sensory neurons and for differentiation of astrocytes (PubMed:10377352). Required for		
	expression of TRPA1 in nociceptive neurons (PubMed:25057188). Required for the		
	maintenance of PTH1R expression in the osteoblast lineage and for the stimulation of PTH-		
	induced osteoblast differentiation (PubMed:25228504). Required for normal trabecular bone		
	mass and cortical bone composition (PubMed:24339143, PubMed:9348227,		
	PubMed:26255596). {ECO:0000250 UniProtKB:P40189, ECO:0000269 PubMed:10377352,		
	ECO:0000269 PubMed:10661409, ECO:0000269 PubMed:1602143,		
	ECO:0000269 PubMed:24339143, ECO:0000269 PubMed:25057188,		
	ECO:0000269 PubMed:25228504, ECO:0000269 PubMed:26255596,		
	ECO:0000269 PubMed:8552649, ECO:0000269 PubMed:9348227}.		
Molecular Weight:	32.0 kDa Including tag.		
UniProt:	Q00560		
Pathways:	JAK-STAT Signaling, Cellular Glucan Metabolic Process, Autophagy, Smooth Muscle Cell		
	Migration, Cancer Immune Checkpoints		
Application Details			
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies		
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee		
	though.		
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the		
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher		
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible		
	options with you in detail to assure that you receive your protein of interest.		
Restrictions:	For Research Use only		

homodimerization and formation of a high-affinity receptor complex, which activates Janus

Liquid

Handling

100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Avoid repeated freeze-thaw cycles.
-80 °C
Store at -80°C.
Unlimited (if stored properly)
