antibodies

Datasheet for ABIN3134849 Clusterin Protein (CLU) (AA 22-226) (His tag)

Overview

Quantity:	1 mg
Target:	Clusterin (CLU)
Protein Characteristics:	AA 22-226
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This Clusterin protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

Product Details

Sequence:	EQEVSDNELQ ELSTQGSRYI NKEIQNAVQG VKHIKTLIEK TNAERKSLLN SLEEAKKKKE
	DALEDTRDSE MKLKAFPEVC NETMMALWEE CKPCLKHTCM KFYARVCRSG SGLVGQQLEE
	FLNQSSPFYF WMNGDRIDSL LESDRQQSQV LDAMQDSFAR ASGIIDTLFQ DRFFARELHD
	PHYFSPIGFP HKRPHFLYPK SRLVR
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	 Mouse Clu Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.

	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	Clusterin (CLU)
Alternative Name:	Clu (CLU Products)
Background:	Functions as extracellular chaperone that prevents aggregation of nonnative proteins. Prevents
	stress-induced aggregation of blood plasma proteins. Inhibits formation of amyloid fibrils by
	ADD ADOC2 D2NA CALCA CON2 ONCA and aggregation property V7 variants (in vitra). Daga pa

APP, APOC2, B2M, CALCA, CSN3, SNCA and aggregation-prone LYZ variants (in vitro). Does not

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3134849 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

	require ATP. Maintains partially unfolded proteins in a state appropriate for subsequent
	refolding by other chaperones, such as HSPA8/HSC70. Does not refold proteins by itself.
	Binding to cell surface receptors triggers internalization of the chaperone-client complex and
	subsequent lysosomal or proteasomal degradation. When secreted, protects cells against
	apoptosis and against cytolysis by complement. Intracellular forms interact with ubiquitin and
	SCF (SKP1-CUL1-F-box protein) E3 ubiquitin-protein ligase complexes and promote the
	ubiquitination and subsequent proteasomal degradation of target proteins. Promotes
	proteasomal degradation of COMMD1 and IKBKB. Modulates NF-kappa-B transcriptional
	activity. Promotes apoptosis when in the nucleus. Inhibits apoptosis when associated with the
	mitochondrial membrane by interference with BAX-dependent release of cytochrome c into the
	cytoplasm. Plays a role in the regulation of cell proliferation (By similarity). {ECO:0000250}.
Molecular Weight:	24.8 kDa Including tag.
UniProt:	Q06890
Pathways:	Apoptosis, Negative Regulation of intrinsic apoptotic Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
