## Datasheet for ABIN3134975 CENPT Protein (AA 1-515) (His tag)

Image

## Overview

Quantity:	1 mg
Target:	CENPT
Protein Characteristics:	AA 1-515
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CENPT protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

## Product Details

Sequence:	MADLSFSDGD PTVRTLLRRV LETADSRTPM RRRSTRINAQ RRRSQTPYSN RQGSQTKTSA
	RKQSHGARSV GRSTRVQGRG RLEEQTPRTL LRNILLTAPE SSTVMPDPVV KPAQVPEVAR

Product Details	
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Cenpt Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and</li> </ol>
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

## Target Details

Target:	CENPT		
Alternative Name:	Cenpt (CENPT Products)		
Background:	Component of the CENPA-NAC (nucleosome-associated) complex, a complex that plays a		
	central role in assembly of kinetochore proteins, mitotic progression and chromosome		
	segregation. The CENPA-NAC complex recruits the CENPA-CAD (nucleosome distal) complex		
	and may be involved in incorporation of newly synthesized CENPA into centromeres. Part of a		
	nucleosome-associated complex that binds specifically to histone H3-containing nucleosomes		
	at the centromere, as opposed to nucleosomes containing CENPA. Component of the		
	heterotetrameric CENP-T-W-S-X complex that binds and supercoils DNA, and plays an		
	important role in kinetochore assembly. CENPT has a fundamental role in kinetochore		
	assembly and function. It is one of the inner kinetochore proteins, with most further proteins		
	binding downstream. Required for normal chromosome organization and normal progress		
	through mitosis (By similarity). {ECO:0000250}.		
Molecular Weight:	57.2 kDa Including tag.		
JniProt:	Q3TJM4		
Application Details			
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies		
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee		
	though.		
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the		
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher		
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible		
	options with you in detail to assure that you receive your protein of interest.		
Restrictions:	For Research Use only		
Handling			
Format:	Liquid		
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.		
Handling Advice:	Avoid repeated freeze-thaw cycles.		
Storage:	-80 °C
