Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:

## Target Details

Target:	CAZIP (MTUS2)
Alternative Name:	Mtus2 (MTUS2 Products)
Background:	Binds microtubules. Together with MAPRE1 may target the microtubule depolymerase KIF2C to the plus-end of microtubules. May regulate the dynamics of microtubules at their growing distal tip (By similarity). {ECO:0000250}.
Molecular Weight:	148.3 kDa Including tag.
UniProt:	Q3UHD3
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher

molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
