antibodies

## Datasheet for ABIN3135613 TGFBR1 Protein (AA 30-503) (rho-1D4 tag)

Overview

Quantity:	1 mg
Target:	TGFBR1
Protein Characteristics:	AA 30-503
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This TGFBR1 protein is labelled with rho-1D4 tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

## Product Details

Sequence:	LQCFCHLCTK DNFTCETDGL CFVSVTETTD KVIHNSMCIA EIDLIPRDRP FVCAPSSKTG
	AVTTTYCCNQ DHCNKIELPT TGPFSEKQSA GLGPVELAAV IAGPVCFVCI ALMLMVYICH
	NRTVIHHRVP NEEDPSLDRP FISEGTTLKD LIYDMTTSGS GSGLPLLVQR TIARTIVLQE
	SIGKGRFGEV WRGKWRGEEV AVKIFSSREE RSWFREAEIY QTVMLRHENI LGFIAADNKD
	NGTWTQLWLV SDYHEHGSLF DYLNRYTVTV EGMIKLALST ASGLAHLHME IVGTQGKPAI
	AHRDLKSKNI LVKKNGTCCI ADLGLAVRHD SATDTIDIAP NHRVGTKRYM APEVLDDSIN
	MKHFESFKRA DIYAMGLVFW EIARRCSIGG IHEDYQLPYY DLVPSDPSVE EMRKVVCEQK
	LRPNIPNRWQ SCEALRVMAK IMRECWYANG AARLTALRIK KTLSQLSQQE GIKM
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Tgfbr1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process</li> </ul>

Product Details	S
	to ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(ather a preserve is a private pleasant carry for any construction in the symptometry preserves for

(other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).

When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.

The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:	Three step purification of membrane proteins expressed in baculovirus infected SF9 insect
	cells:
	<ol> <li>Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with different detergents (detergent screen). Samples are analyzed by Western blot.</li> <li>The best performing detergent is used for solubilization and the proteins are purified via their rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate fractions are analyzed by Western blot.</li> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade

Target Details	
Target:	TGFBR1
Alternative Name:	Tgfbr1 (TGFBR1 Products)
Background:	Transmembrane serine/threonine kinase forming with the TGF-beta type II serine/threonine
	kinase receptor, TGFBR2, the non-promiscuous receptor for the TGF-beta cytokines TGFB1,
	TGFB2 and TGFB3. Transduces the TGFB1, TGFB2 and TGFB3 signal from the cell surface to
	the cytoplasm and is thus regulating a plethora of physiological and pathological processes
	including cell cycle arrest in epithelial and hematopoietic cells, control of mesenchymal cell
	proliferation and differentiation, wound healing, extracellular matrix production,
	immunosuppression and carcinogenesis. The formation of the receptor complex composed of
	2 TGFBR1 and 2 TGFBR2 Molecules symmetrically bound to the cytokine dimer results in the
	phosphorylation and the activation of TGFBR1 by the constitutively active TGFBR2. Activated
	TGFBR1 phosphorylates SMAD2 which dissociates from the receptor and interacts with
	SMAD4. The SMAD2-SMAD4 complex is subsequently translocated to the nucleus where it
	modulates the transcription of the TGF-beta-regulated genes. This constitutes the canonical
	SMAD-dependent TGF-beta signaling cascade. Also involved in non-canonical, SMAD-
	independent TGF-beta signaling pathways. For instance, TGFBR1 induces TRAF6
	autoubiquitination which in turn results in MAP3K7 ubiquitination and activation to trigger
	apoptosis. Also regulates epithelial to mesenchymal transition through a SMAD-independent
	signaling pathway through PARD6A phosphorylation and activation (By similarity).
	{EC0:0000250 UniProtKB:P36897}.
Molecular Weight:	54.5 kDa Including tag.
UniProt:	Q64729
Pathways:	Growth Factor Binding
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.

Restrictions: For Research Use only

## Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
