### Target Details

Background:	Catalyzes the initial step in triglyceride hydrolysis in adipocyte and non-adipocyte lipid droplets
	(PubMed:15550674). Also has acylglycerol transacylase activity. May act coordinately with
	LIPE/HLS within the lipolytic cascade. Regulates adiposome size and may be involved in the
	degradation of adiposomes. May play an important role in energy homeostasis. May play a role
	in the response of the organism to starvation, enhancing hydrolysis of triglycerides and
	providing free fatty acids to other tissues to be oxidized in situations of energy depletion.

## Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
