## Datasheet for ABIN3136254 KIRREL3 Protein (AA 22-535) (His tag)

Overview

Quantity:	1 mg
Target:	KIRREL3
Protein Characteristics:	AA 22-535
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This KIRREL3 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

This protein is a made to order protein and will be made for the first time for your ord	er. Our
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in comparison to ordering	custom
made proteins from other companies is that there is no financial obligation in case th cannot be expressed or purified.	e protein
In the unlikely event that the protein cannot be expressed or purified we do not charg	e anvthing
(other companies might charge you for any performed steps in the expression proces	, .
custom-made proteins, e.g. fees might apply for the expression plasmid, the first exp	
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the corre	ectly
folded protein. With no financial risk on your end you can rest assured that our experi	-
protein experts will do everything to make sure that you receive the protein you order	
The concentration of our recombinant proteins is measured using the absorbance at	
The protein's absorbance will be measured in several dilutions and is measured agair	
specific reference buffer.	
' The concentration of the protein is calculated using its specific absorption coefficien	. We use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using the different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Elu fractions are analyzed by SDS-PAGE.</li> </ol>	ate
<ol> <li>Protein containing fractions of the best purification are subjected to second purific through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAG Western blot.</li> </ol>	•
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blo	t.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

## Target Details

Target:	KIRREL3
Alternative Name:	Kirrel3 (KIRREL3 Products)
Background:	Synaptic adhesion molecule required for the formation of target-specific synapses
	(PubMed:23637329, PubMed:26575286). Required for formation of target-specific synapses at
	hippocampal mossy fiber synapses. Required for formation of mossy fiber filopodia, the
	synaptic structures connecting dentate granule and GABA neurons. Probably acts as a
	homophilic adhesion molecule that promotes trans-cellular interactions and stabilize mossy
	fiber filipodia contact and subsequent synapse formation (PubMed:26575286). Required for the
	coalescence of vomeronasal sensory neuron axons (PubMed:23637329). May be involved in
	the hematopoietic supportive capacity of stroma cells, the secreted extracellular domain is
	directly responsible for supporting hematopoietic stem cells (PubMed:12665856).
	{ECO:0000269 PubMed:12665856, ECO:0000269 PubMed:23637329,
	EC0:0000269 PubMed:26575286}.
Molecular Weight:	57.0 kDa Including tag.
JniProt:	Q8BR86
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
