Datasheet for ABIN3136277 SMAD3 Protein (AA 2-425) (His tag)

Image

Overview

Quantity:	1 mg
Target:	SMAD3
Protein Characteristics:	AA 2-425
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SMAD3 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Mouse Smad3 Protein (raised in Insect Cells) purified by multi-step, protein-specific process
	to ensure crystallization grade.

	• State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

Target Details

Background:	Receptor-regulated SMAD (R-SMAD) that is an intracellular signal transducer and	
	transcriptional modulator activated by TGF-beta (transforming growth factor) and activin type 1	
	receptor kinases. Binds the TRE element in the promoter region of many genes that are	
	regulated by TGF-beta and, on formation of the SMAD3/SMAD4 complex, activates	
	transcription. Also can form a SMAD3/SMAD4/JUN/FOS complex at the AP-1/SMAD site to	
	regulate TGF-beta-mediated transcription. Has an inhibitory effect on wound healing probably	
	by modulating both growth and migration of primary keratinocytes and by altering the TGF-	
	mediated chemotaxis of monocytes. This effect on wound healing appears to be hormone-	
	sensitive. Regulator of chondrogenesis and osteogenesis and inhibits early healing of bone	
	fractures. Positively regulates PDPK1 kinase activity by stimulating its dissociation from the 14-	
	3-3 protein YWHAQ which acts as a negative regulator (By similarity). {ECO:0000250,

Molecular Weight:	48.9 kDa Including tag.	
UniProt:	Q8BUN5	
Pathways:	Cell Division Cycle, Chromatin Binding, Cell-Cell Junction Organization, Positive Regulation of	
	Endopeptidase Activity, Autophagy	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies	
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee	
	though.	
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the	
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher	
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible	
	options with you in detail to assure that you receive your protein of interest.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.	
	ree minimace, zo minimepes, re/o giyeeroi, privalae is at the discretion of the manufacturer.
